PayPal Payflow Plugin

Configuring the PayPal Payflow Package

To configure the PayPal Payflow, you need to follow the steps as described.

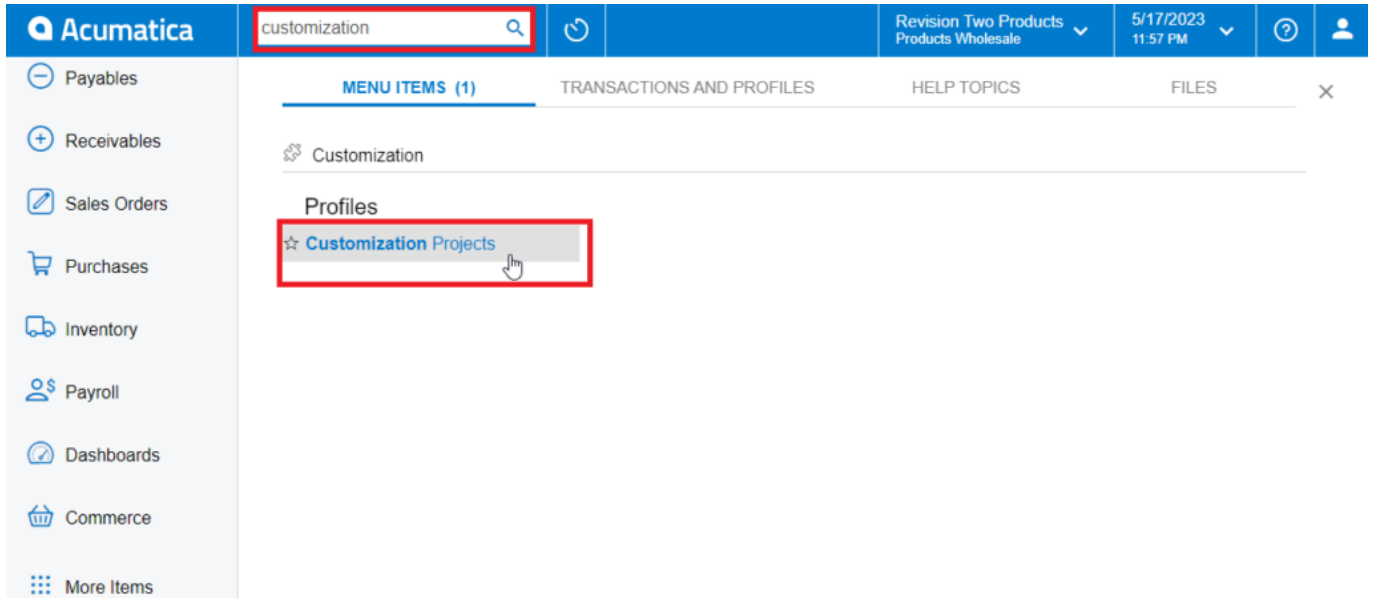

1. Save the .zip file of the **PayPal Payflow** package to the local hard drive.
2. Go to the left navigation pane in Acumatica and choose “**More Items**”.
3. Click “**Customization**”.

Customization Projects

OR

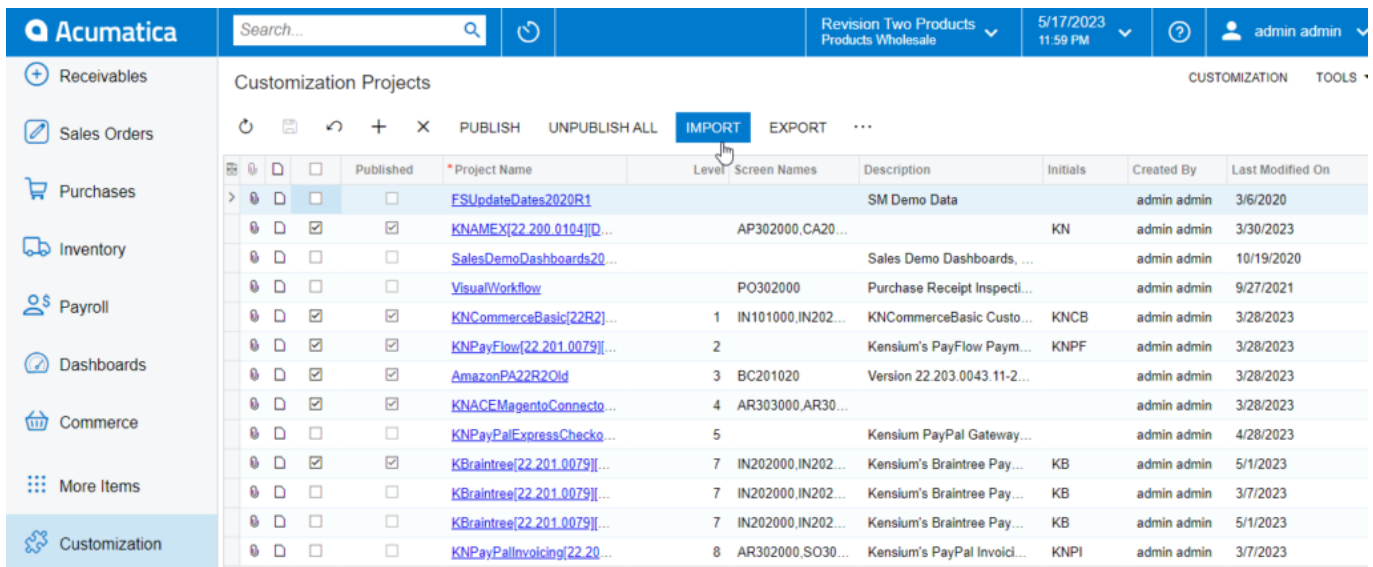

Type the keyword “Customization” in the universal search bar.

The screenshot shows the Acumatica interface. The search bar at the top contains the word "customization". Below the search bar, under the "MENU ITEMS (1)" tab, the "Customization" section is expanded, showing a list of "Profiles". The "Customization Projects" profile is highlighted with a red box and a hand cursor pointing to it.

Customization Projects through the search bar

4. Click **"Customization Projects"**.
5. Click the **"Import"** button.

The screenshot shows the "Customization Projects" table in Acumatica. The table has columns for "Published", "Project Name", "Level", "Screen Names", "Description", "Initials", "Created By", and "Last Modified On". The "Import" button is highlighted with a red box and a hand cursor pointing to it.
