

## Verifying the Published Packages

Once the customization package is installed, the connections must be established between Acumatica and PayPal Payflow.

1. To verify the published package, navigate to the left menu in Acumatica ERP, click **Customization**, and select **Customization Projects**.

Customization Projects

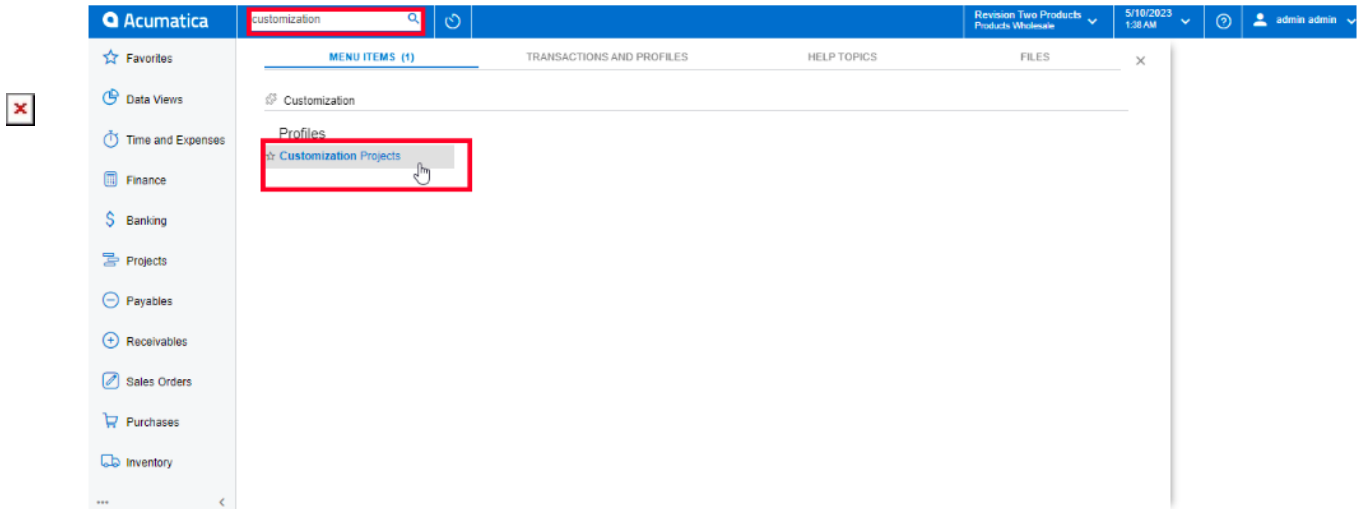

**OR**

Type the keyword “**Customization Project**” in the universal search bar.

## PayPal Payflow Plugin

### Customization Projects

- The application directs you to a Customization Projects screen, where you can review and validate the published packages.

The screenshot shows the 'Customization Projects' screen in Acumatica. The top navigation bar includes the 'Acumatica' logo, a search bar, and user information. The left sidebar lists various modules like Receivables, Sales Orders, Purchases, Inventory, Payroll, and Dashboards. The main content area shows the 'Customization Projects' section with a table of project packages. The 'PUBLISH' button is highlighted with a red box. The table has columns for Published, Project Name, Level, Screen Names, Description, and Initials. The last row, 'KNPayFlow[22.201.0079]...', is highlighted with a red box.
