

Verifying the Published Packages

Once the customization package is installed, the connections must be established between Acumatica and PayPal Payflow.

1. To verify the published package, navigate to the left menu in Acumatica ERP, click **Customization**, and select **Customization Projects**.

Customization Projects

OR

Type the keyword “**Customization Project**” in the universal search bar.

Customization Projects

- The application directs you to a Customization Projects screen, where you can review and validate the published packages.

A screenshot of the 'Customization Projects' screen in Acumatica. The page title is 'Customization Projects'. Below the title, there are action buttons: 'PUBLISH' (highlighted with a red box), 'UNPUBLISH ALL', 'IMPORT', and 'EXPORT'. Below the buttons is a table listing various customization projects.
