

Setting up Payflow as a Processing Center for Payment Methods

To assign payment methods, the initial step is to add the PayPal Payflow plugin as a processing centre, followed by assigning Payflow payment methods to customers.

These settings are essential for seamless Payflow processing and the integration of data with the Payflow merchant site. To configure and establish Payflow as the designated system for handling and processing diverse payment methods, follow these precise steps:

1. Save the Payflow merchant site credentials in Acumatica ERP.
2. Add PayPal Payflow as a processing center in Acumatica ERP.

The screenshot displays the Acumatica ERP interface. The top navigation bar includes the Acumatica logo, a search field, and user information: "Revision Two Products", "Products Wholesale", and the date/time "2/21/2025 2:43 AM". The left sidebar contains a menu with categories: Favorites, Data Views, Time and Expenses, Finance, Banking, Projects, Payables (selected), Receivables, Sales Orders, Purchases, Inventory, Configuration, Dashboards, and More Items. The main content area is titled "Payables: Quick Menu" and features four primary action buttons: "New Bill", "New Payment", "Vendor Details", and "New Vendor". Below these buttons are three columns of links: "Transactions" (Bills and Adjustments, Payments and Applications, Checks and Payments, Payments and Applications), "Reports" (AP Balance by GL Account, AP Balance by Vendor, AP Aged Past Due, AP Aged Period Sensitive), and "1099 Reporting" (1099-MISC Form, Create E-File, 1099 Vendor History, Close 1099 Year). Further down, there are sections for "Profiles" (Vendors, Credit Terms, Customer Payment Methods), "Credit Card Processing" (with "Processing Centers" highlighted), and "Processes" (Release AP Documents, Prepare Payments, Process Payments / Print Checks, Release Payments, Approve Bills for Payment). On the right side, there are sections for "Preferences" (Payment Methods) and "Other" (Process PayPalPayFlow Transa..., Process Braintree Transactions, Confirm PayPal Payments and A..., Request PayPal Payments and ..., Request PayPal Payments and ..., Confirm PayPal Payments and A...).

Payables Workspace

3. Click the + button to add a new processing centre.
4. Enter the name of the processing centre in the **Proc. Center ID** field.
5. Enter a description for the processing centre in the **Name** field.
6. Click the **Active** checkbox.
7. Select a **Payment Plug-In (Type)** field.
8. Click **Save**.
9. Click the **Test Credentials** button.
10. Upon successful authentication, a pop-up message confirming the authentication should be displayed.
