

# Configuring KNCentralizedLicenseConsole From 23R1

**Centralized License Console**, a potent solution for simplified license administration across our product line, is now **Available** Whether you use one or more product packages, this integrated license module acts as a central hub for effectively managing licenses. A single download of this package will enable you to use the new module, which is available starting with version 23R1.

We are publishing the **[KNCentralizedLicenseConsole]** package in the instance.

- **New customers**: The New Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.
- **Existing Customers:** Before Publishing the new License packages, All the existing product packages should be updated with new Packages which are compatible with the new licensing engine.
  - A Clean-up Script will be run to remove all existing License tables.
  - $\circ~$  The new Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.

To configure the [KNCentralizedLicenseConsole], you need to follow these steps.

- 1. Save the .zip file of the [KNCentralizedLicenseConsole] package to the local hard drive.
- 2. Click on the left panel in Acumatica and select [More Items].
- 3. Click on [Customization], and you will be redirected to the Customization Projects screen.
