

API Settings

After completing the activation of [VERIFY FTP ACCESS], [REQUEST API ACCESS], and [VERIFY API ACCESS], the **[URLs (Uniform Resource Locator)]** will automatically appear in the API SETTINGS page.

The screenshot displays the 'API SETTINGS' page within the 'Site Configuration' interface. The page is titled 'Site Configuration' and includes a search bar, navigation tabs (REQUEST API ACCESS, VERIFY API ACCESS, VERIFY FTP ACCESS, TRIGGER BULK EXPORT), and a sidebar with various system icons. The 'API SETTINGS' tab is highlighted with a red box. The settings are as follows:

Setting	Value
Unique Name for the site	Test
Description	Test
Active	<input checked="" type="checkbox"/>
