

Classification Mappings

The practice of transferring Acumatica classifications to Rithum Connector Classifications is known as classification mapping. This key step guarantees that products are correctly classified based on their Acumatica classifications when they are offered on marketplaces via Rithum Connector.

Create Item Class and Classification in Acumatica and Rithum

You need to navigate to the left panel of Acumatica and click on **[Rithum]** then click on **[Classifications** mapping] under **[Preferences]**.

Classification Mapping

Upon opening the screen, you can view.

REFRESH LIST OF CLASSIFICATIONS: If you create any item class in Rithum Connector it will be available in Classification in Acumatica.

INIT ITEM CLASSES: If you create any item class in Acumatica it will synchronize to Acumatica and will be available in Item Classes.

• You need to select the store from the [Store] selector.

Creating Item Classes

You need to search for **[Item classes]** in the Global search bar. Click on **[Item classes]** under **[Preferences]** then you will be redirected to item class screen in Acumatica.

Toggle the Checkbox

- You can view Created [Item Class] under [Classifications] in Acumatica.
- To perform the sync, the classification name MUST be entered EXACTLY as it appears in Rithum Connector.
- You must Enable the **[Is Mapped]** radio buttons to synchronize the stock item from Acumatica to Rithum Connector.
- Click on [Save] to establish the connection between Item Classes and Classifications.
- In the Rithum Connector SKU field, enter a base SKU (Store Keeping Unit) for the Classification.
- Entering a SKU into this field will become a base SKU for reference to this Classification. All Attributes for that classification will be mapped to this base SKU.
- Click on [Save].
