

FTP Configuration

You have an FTP configuration, so when the products are created or updated inside of Acumatica you can send the products into Rithum Connector using the FTP approach.

- Before verifying the **[FTP Access]**, you need to enter the field details in **[FTP Configuration]** which are mandatory.
 - Host name
 - Username
 - Password
 - Confirm Password
 - Input Delivery
- The Username, Password, Confirm Password should be same as **[Login credentials of Rithum Connector]**, Input delivery should be **[Inventory]**.

The screenshot shows the Acumatica interface for Site Configuration. The 'Verify FTP Access' button is highlighted with a red box. The 'Active' checkbox is also checked. The 'FTP CONFIGURATION' section is expanded, showing the following details:

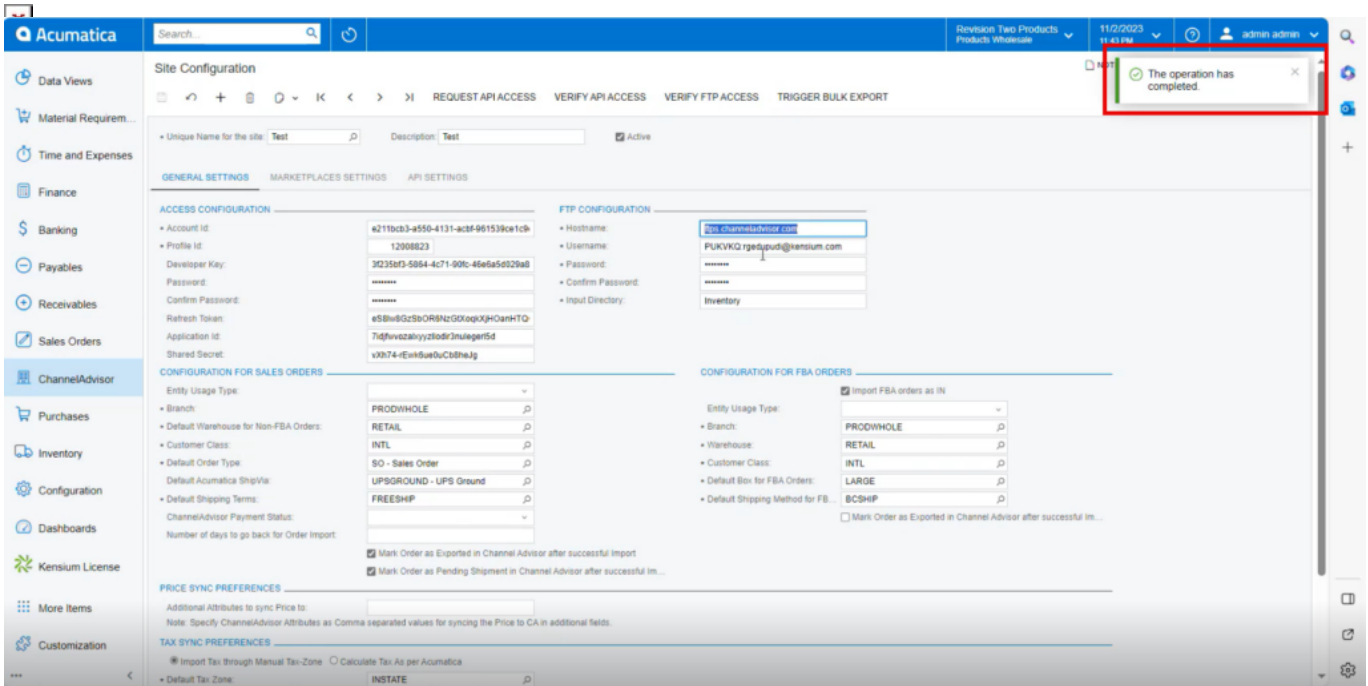

Field	Value
Account Id	e211bcb3-a550-4131-acbf-961539ce1c9
Profile Id	12008823
Developer Key	3f235bf3-5864-4c71-90c-46e6a5d029a8
Password	*****
Confirm Password	*****
Refresh Token	eS8lw8GzSbOR6NzG0XoqKXjH0anHTQ
Application Id	7idfwwozabyyzllodir3nulegerf5d
Shared Secret	vXh74-rEwk6ue0uCb8heJg
Hostname	fts.channeladvisor.com
Username	PUKVVKQ.rgedupudi@kensium.com
Password	*****
Confirm Password	*****
Input Directory	Inventory

A red callout box points to the Username and Password fields with the text: "User name and password is same as login password of ChannelAdvisor".

FTP Configuration

- You must enable the **[Active]** check box.
- Click on **[Save]** to save the site configuration.
- Click on **[Verify FTP Access]**.

- A pop-up will appear on the top right-hand corner on the screen confirming **[The Operation has Completed]**.

Operation Completed

All this data that comes with the various product counts will be visible to you. All these arrive with the product information. As a result, whenever a product is updated, produced, and designated for CA, it enters Channel Advisor Connector via the FTP method, and you will see the file or listing appear here.
