

# Log Preferences

Log preferences in Acumatica involves specifying settings related to the logging functionality within the system.

If you enable the **[Enable Default Logs]**, you can view the sync of product inventory, shipment, Sales order in the log screen. This will show you exactly how much of your products are sending along with the quantity, in detail. This information will also be available on the **[Log preferences]**.

The screenshot displays the 'Site Configuration' page in Acumatica. The 'LOG PREFERENCES' section is visible at the bottom, with the 'Enable Detail Logs' checkbox checked and highlighted by a red rectangle. Other sections include 'CONFIGURATION FOR SALES ORDERS', 'CONFIGURATION FOR FBA ORDERS', 'PRICE SYNC PREFERENCES', 'TAX SYNC PREFERENCES', 'CASH ACCOUNT SYNC PREFERENCES', and 'SYNC PREFERENCES'.
