

Log Preferences

 Log preferences in Acumatica involves specifying settings related to the logging functionality within the system.

If you enable the **[Enable Default Logs]**, you can view the sync of product inventory, shipment, Sales order in the log screen. This will show you exactly how much of your products are sending along with the quantity, in detail. This information will also be available on the **[Log preferences]**.

The screenshot shows the 'Site Configuration' page in Acumatica. The 'LOG PREFERENCES' section is expanded, and the 'Enable Detail Logs' checkbox is checked and highlighted with a red box. Other sections visible include 'CONFIGURATION FOR SALES ORDERS', 'CONFIGURATION FOR FBA ORDERS', 'PRICE SYNC PREFERENCES', 'TAX SYNC PREFERENCES', 'CASH ACCOUNT SYNC PREFERENCES', and 'SYNC PREFERENCES'.
