

Tax Sync Preferences

To ensure accurate tax calculations and synchronization between Rithum Connector and Acumatica. The format should include tax rules, rates, exemptions, and tax codes mapping between the two systems.

By creating the appropriate Tax Zone in Acumatica, businesses can ensure that the correct tax calculations are applied to orders imported from Rithum Connector.

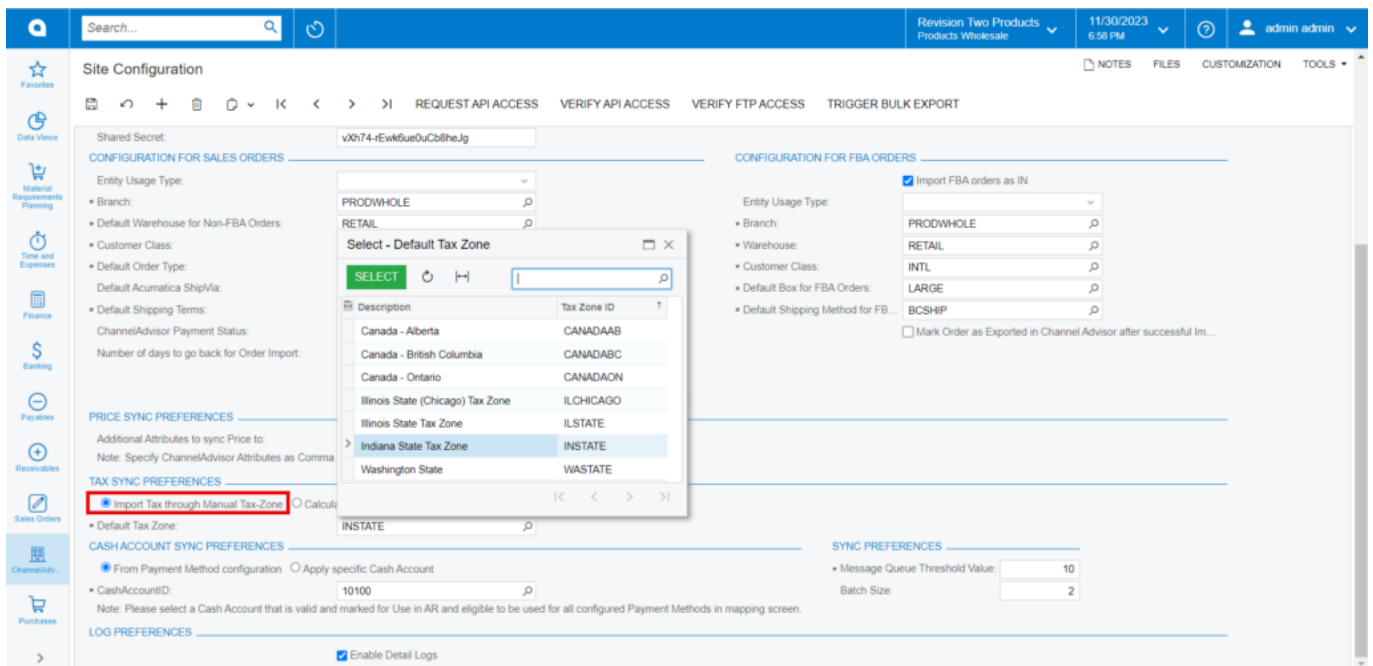

- You can select any of the options from the **[Tax Sync Preferences]**.

Import Tax Through Manual Tax-Zone:

If you choose **[Import Tax Through Manual Tax-Zone]** using manual tags, you need to set up manual zones and manual tax.

As a result, when you place an order in Acumatica with tax, the order immediately creates a tax, and this will be added as a manual tax.

- Search for **[Default tax zone]**, from the **[Default Tax Zone]** available in Acumatica.

The screenshot shows the 'Site Configuration' page in Acumatica. Under the 'TAX SYNC PREFERENCES' section, the 'Import Tax through Manual Tax-Zone' option is selected and highlighted with a red box. A modal window titled 'Select - Default Tax Zone' is open, displaying a list of tax zones with 'Indiana State Tax Zone' selected. The modal window has a search bar and a 'SELECT' button. The background page shows various configuration options for sales orders and FBA orders.

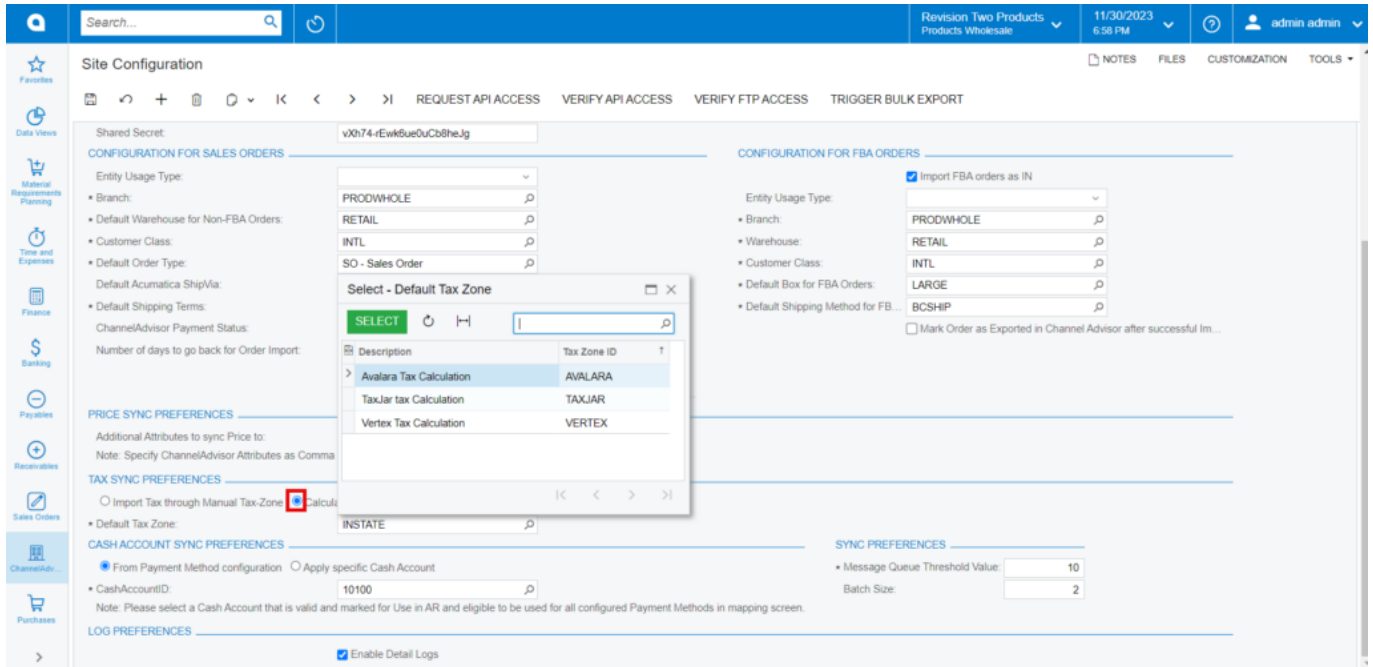

Description	Tax Zone ID
Canada - Alberta	CANADAAB
Canada - British Columbia	CANADABC
Canada - Ontario	CANADAON
Illinois State (Chicago) Tax Zone	ILCHICAGO
Illinois State Tax Zone	ILSTATE
Indiana State Tax Zone	INSTATE
Washington State	WASTATE

Calculate Tax As per Acumatica

If you choose [Calculate Tax As per Acumatica], Acumatica will sync the tax from Rithum Connector to the sales order, regardless of the tag.

- ✘ • Search for [Default tax zone], from the [Default Tax Zone] available in Acumatica.

The screenshot displays the 'Site Configuration' page in Acumatica. The 'TAX SYNC PREFERENCES' section is active, showing options for 'Import Tax through Manual Tax Zone' and 'Calculate Tax As per Acumatica'. A modal window titled 'Select - Default Tax Zone' is open, displaying a table of available tax zones:

Description	Tax Zone ID
Avalara Tax Calculation	AVALARA
TaxJar tax Calculation	TAXJAR
Vertex Tax Calculation	VERTEX

The 'Calculate Tax As per Acumatica' option is highlighted with a red box. The background configuration includes sections for 'CONFIGURATION FOR SALES ORDERS' and 'CONFIGURATION FOR FBA ORDERS'.
