

Product Custom Column Mapping

 Product custom column mapping is used to map Acumatica Attributes to SellerCloud Connector Custom columns.

If you wish to sync specific data from Acumatica to a separate custom field that you created in SellerCloud Connector, you can use this mapping option, and the data will be updated depending on the mapping.

Scenario-1 Enabling Product

- If the attributes are not assigned to the item class, then assign the attribute to the item class follow the below steps to create Item Class.

Attribute Screen

- You need to navigate to the **[GENERAL]** and click on the Pencil icon in the item class.
