

# **Product Custom Column Mapping**

Froduct custom column mapping is used to map Acumatica Attributes to SellerCloud Connector Custom columns.

If you wish to sync specific data from Acumatica to a separate custom field that you created in SellerCloud Connector, you can use this mapping option, and the data will be updated depending on the mapping.

# **Scenario-1 Enabling Product**

• If the attributes are not assigned to the item class, then assign the attribute to the item class follow the below steps to create Item Class.

#### Attribute Screen

• You need to navigate to the [GENERAL] and click on the Pencil icon in the item class.

| Acumatica  | Search   | <u> </u>   |   |  | F  | Revision Two Products  Products Wholesale | 11/6/2023<br>11:09 PM | 0      | 💄 admin adm |

Site Configuration

- To access product custom column mapping, you need to click on **[Product custom column Mapping]** under **[Configurations].** Then you will be redirected to a new page.
- This relates to the mapping of attributes.
- You must search for the [connector ID].
- Click on **[Initialize columns]**, then a pop-up will appear, where you need to enter **[Product ID]** to fetch the custom column mapping.
- You need to enter [Ref SKU for Product C], this should match with SellerCloud Connector.
- This allows you to Fetch the customized column mapping.

Select Product Type

- You must enable the check box for **[Enable Kensium Commerce Framework]** and then enable the check box for **[Connector Type]** and select the **[product type]** from the drop-down menu:
- ×
- MAIN SKU
  - SHADOW SKU
- Click on [Save].
- Similarly, you need to add **[Default price]** for the remaining child's items and map with Kensium Commerce.
- You need to navigate to the [Inventory] and click [Receipts] under [Transactions].
- Click on [+] icon.
