

# **Real-Time Process (Commerce Connector)**

The scheduler for the connector is automatically built during initialization. The data will always be processed automatically by the schedulers. If the scheduler is inactive for any reason, you must select the **[Real Time Process]** option.

#### Option for Real-Time Process

These consist of the Following Options.

- Master Data Sync
- Product
- Template ID
- Kits Items
- Pricing
- Inventory
- Sales Prices
- Order
- Order Status
- Shipment
- Entity Delete Action
- Clear Logs

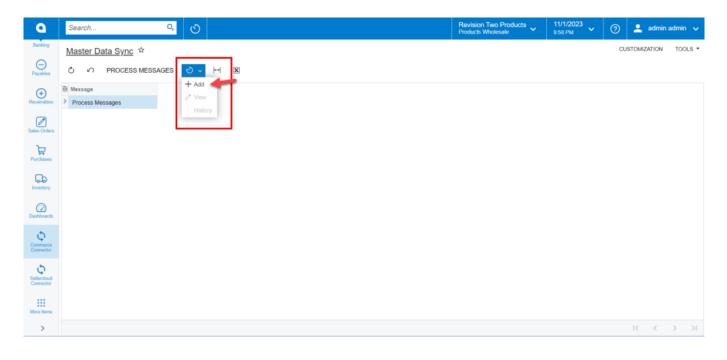

# **Master Data Syncs**

If the sync doesn't work through the schedulers, you can use this option.

• Click on the [Master Data Syncs], and you will be redirected to the following screen.

Master Data Sync

• You need to click on the [+] Add icon, and a new screen will pop up as shown below.
