Next Shipment button size increased

A UI change has been made on the [Pick] screen. The [NEXT SHIPMENT] button size has been increased.

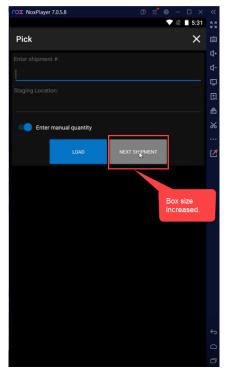

Figure: Button size increased

Known Bugs and Issues Fixes

Version 8.13.1

- The application crashed on the Handheld when the [Weight] button was clicked on the [Pack] screen.
- In the [Process Shipment] screen, an error message appeared when the [Create Wave Pick] action was selected and processed. A similar issue occurred when the action was changed to [Confirm Shipment].
- The [Show Printed] checkbox did not appear when the action was set to [Print Pick List] on the Process Shipment screen.

Version 8.13.2

- We have resolved an issue in the [Container] screen. While deleting any container from the [Container] screen, some empty transfers were created automatically.
- We have resolved the issue while creating the zone. Special characters are now allowed to create the Zones in the Fusion Warehouse Preferences.

Version 8.13.3

- We have resolved an issue in the Wave Pick screen. Upon clicking an error message appeared as [The given key was not present in the dictionary].
- An unhandled error occurred when attempting to delete a shipment from Acumatica, preventing the system from completing the process.

• An error occurred in the application when clicking Create Wave Pick in the Shipment screen due to an internal issue with the Packages.

Version 8.13.7

• The Handheld crashed in the [BINCHECK] module when used on an Acumatica version lower than 23R1.
