New Features and Enhancements

Renamed the Endpoint to FRFusionAdvanced in Web Service

We have updated HandHeld to use the renamed endpoint in the web service, changing it from FRFusionWMS to FRFusion Advanced.

Navigation: Integration \rightarrow Web Service Endpoints under Preferences, the following screen will appear.

Introduction of Primary Location on the HandHeld

We have added an option on the HandHeld as [Primary Location] in the [Put Away] module. When you assign any Primary Location in the Item Warehouse Details, the same will be reflected on the new field on the HandHeld.

Navigation; Inventory \rightarrow Item WareHouse Details \rightarrow Primary Location

Navigate to HandHeld and click on the [PutAway]. Prim Loc field will be displayed on the Putaway screen.

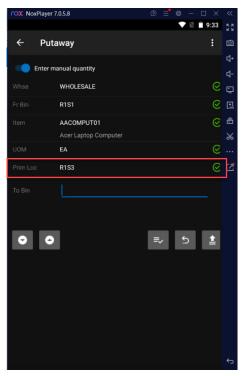

Figure: Prim Loc field on the Putaway screen

Sales Order Number field on the HandHeld

On the Handheld, there are three options for packing a shipment: Pack screen, PickPack, and Multipack. When you create multiple SO line items with different S.O. numbers and ship them using the Pack, PickPack, or Multipack screen, the Handheld will display the respective Sales Order Number.

You can enter the Length, Height and Weight of the stock items, if applicable.

Installation Changes

There are no installation changes included in this release.

UI Changes

Workspace	Screen	Entity

Known Bugs and Issues Fixes

- In the [Process Order] screen we have resolved an issue. An error message appeared after clicking on the [Optimize Shipment] when the action type was selected as [Create Shipment].
- In the [Process Order] screen upon clicking on the Optimize Shipment the grid color was displayed on the first page. The color indicates the stock quantity. If the stock item has enough quantity for shipment the grid becomes green otherwise red. Instead of showing all the pages it was showing only one page.
