New Features and Enhancements

Remove dependency on GI and Push Notifications

The previous version has an initialization screen for Generic Inquiries and Push Notifications in Rithum Connector. Now, we have removed the dependency on Generic Inquiries and Push Notifications. You can sync the [Product Details] from Acumatica to Rithum Connector.

File Name Enhancement

We have enhanced the file name in Rithum Connector in this released version. Navigate to Rithum Connector and under Product Catalogue click on Imports/Exports as shown below.

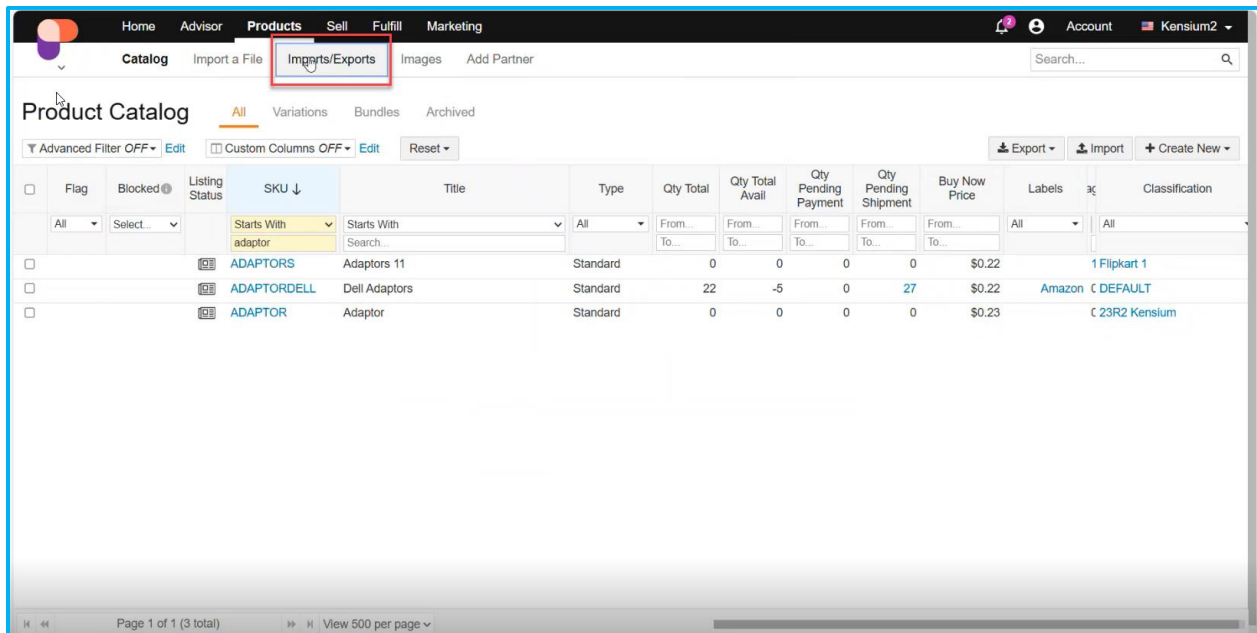

Figure: Click on Imports/Exports

Upon clicking on the Imports/ Exports the following screen will appear.

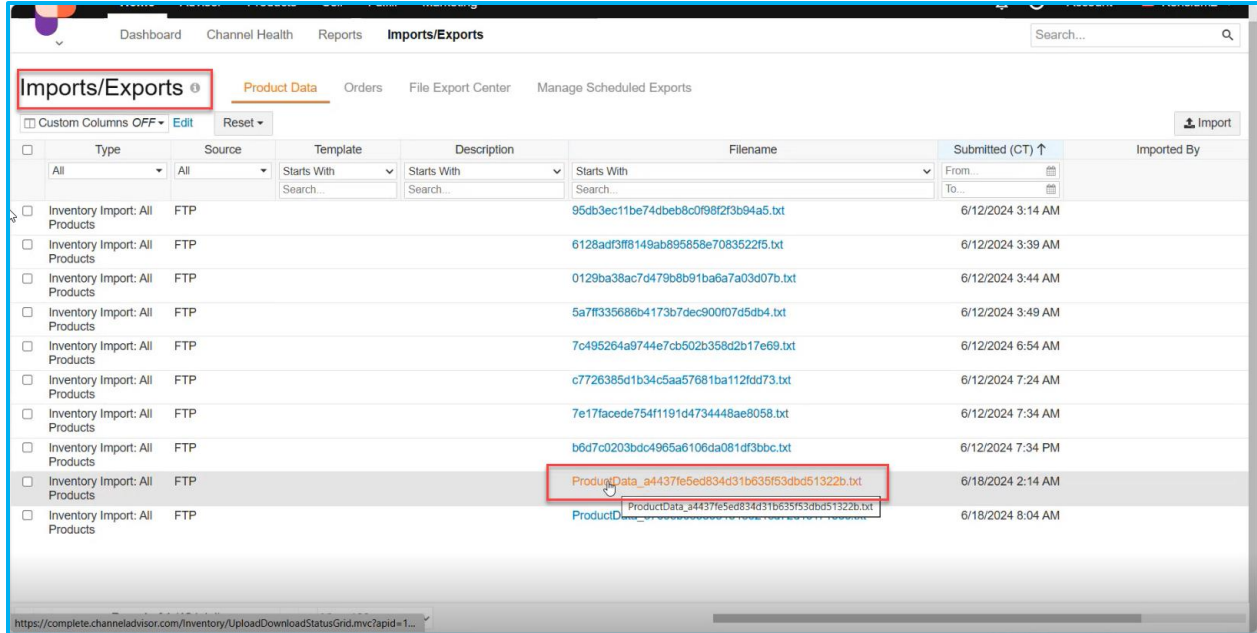

Figure: Imports/ Exports screen

Once this enhancement is applied, you will be able to view the Product Data under the File Name column. After the modification, the file name will begin with **[Product Data]**, as shown in the screenshot above.

Option introduced to modify the Product and Inventory Sync

You will be now allowed to modify the Product and Inventory Sync in Rithum Connector. Navigate to Acumatica click on [Channel Advisor] on the left panel and go to the Request Log screen under the [Audit] option.

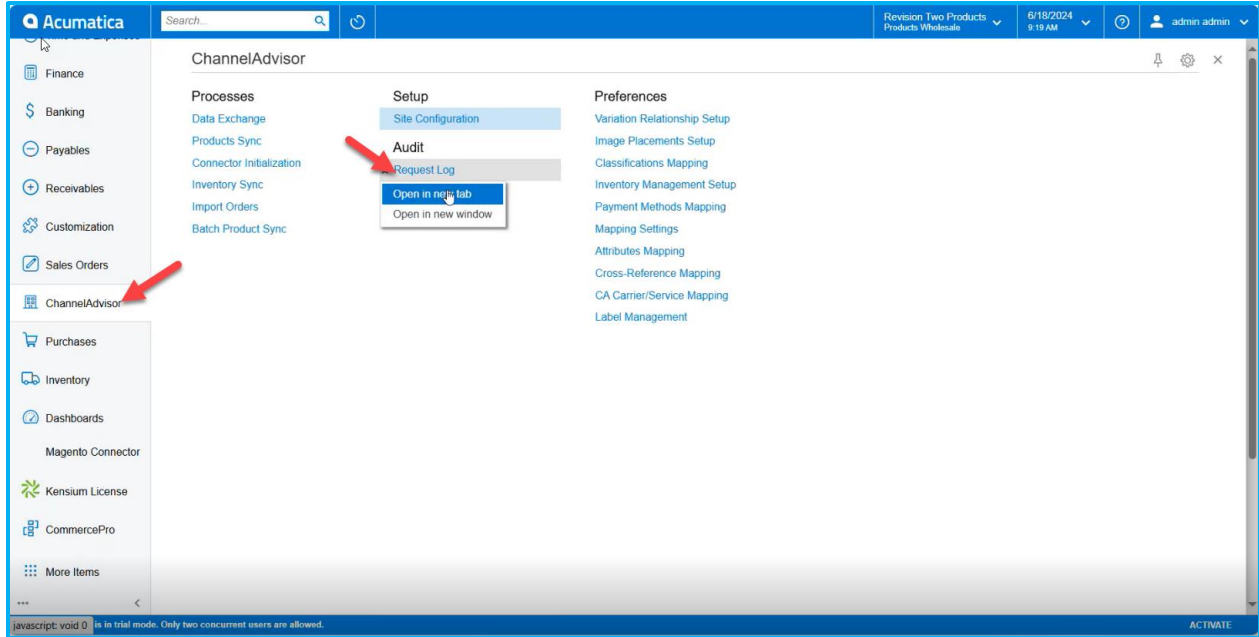

Figure: Click on the Request Log.

Upon clicking on the [Request Log] the following screen will appear.

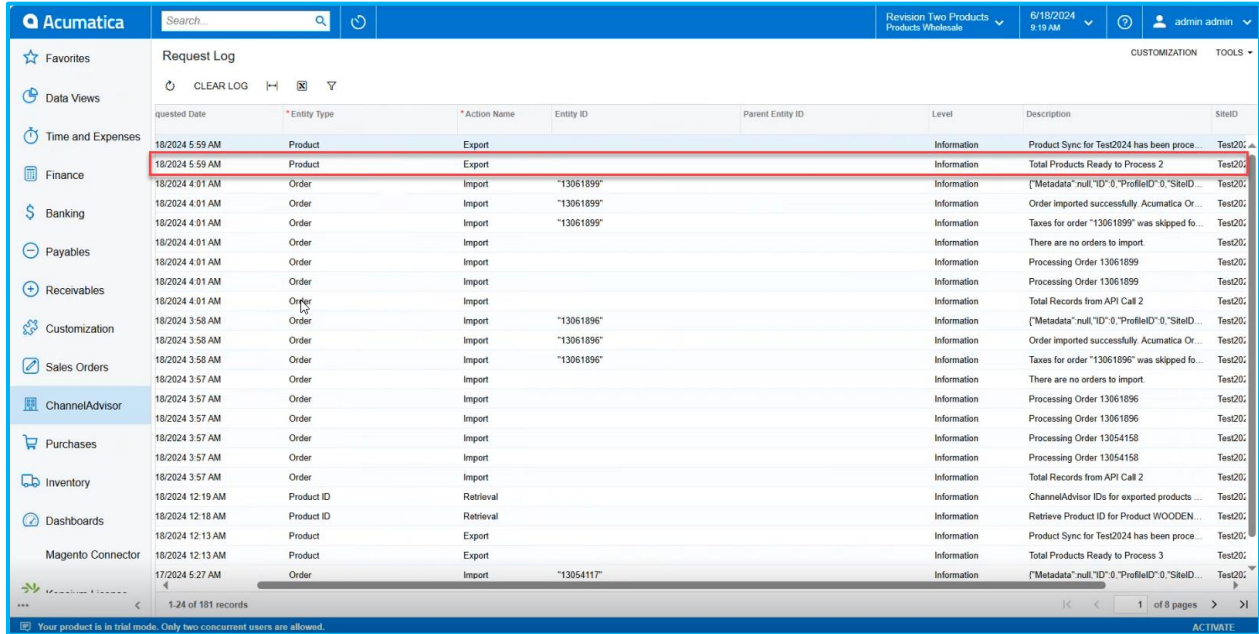

Figure:

So now when we are syncing the product from Acumatica to Rithum Connector under the description the logs clearly show that [Total Products Ready to Process 2]. Also, you can view the file by clicking on the icon beside the [Request ID] for the file name.

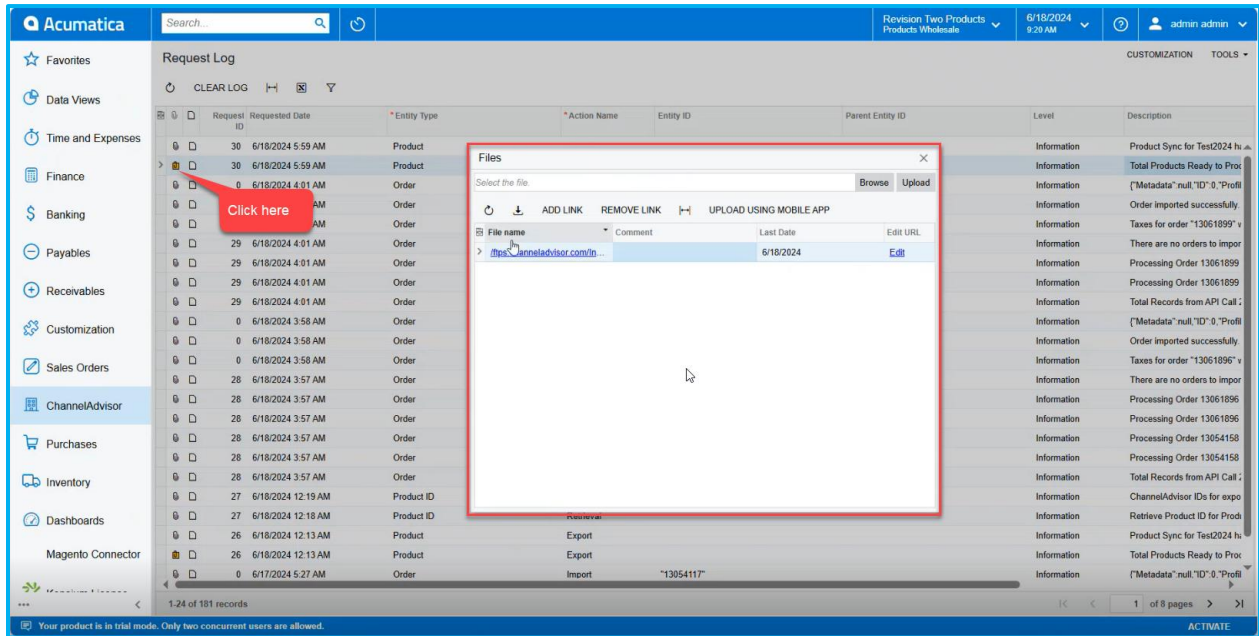

Figure: Click on the icon to the Files pop-up.

Upon clicking on the [File name], the following screen will appear. This will display the Product name, Type of the product, Price of the Product, Label Type, and Attribute assigned to the Stock Item. Assigned quantity etc. This feature has been introduced in this release.

Figure: File with Product Details.

Product Data Split Feature

We have introduced the Product Data split feature in this release. Navigate to Acumatica click on [Channel Advisor] and go to the [Site Configuration] screen. In the Site Configuration screen,

you will view an option [Sync Preferences]. The following options will be available under the Sync Preferences.

- Message Queue Threshold Value
- Batch Size

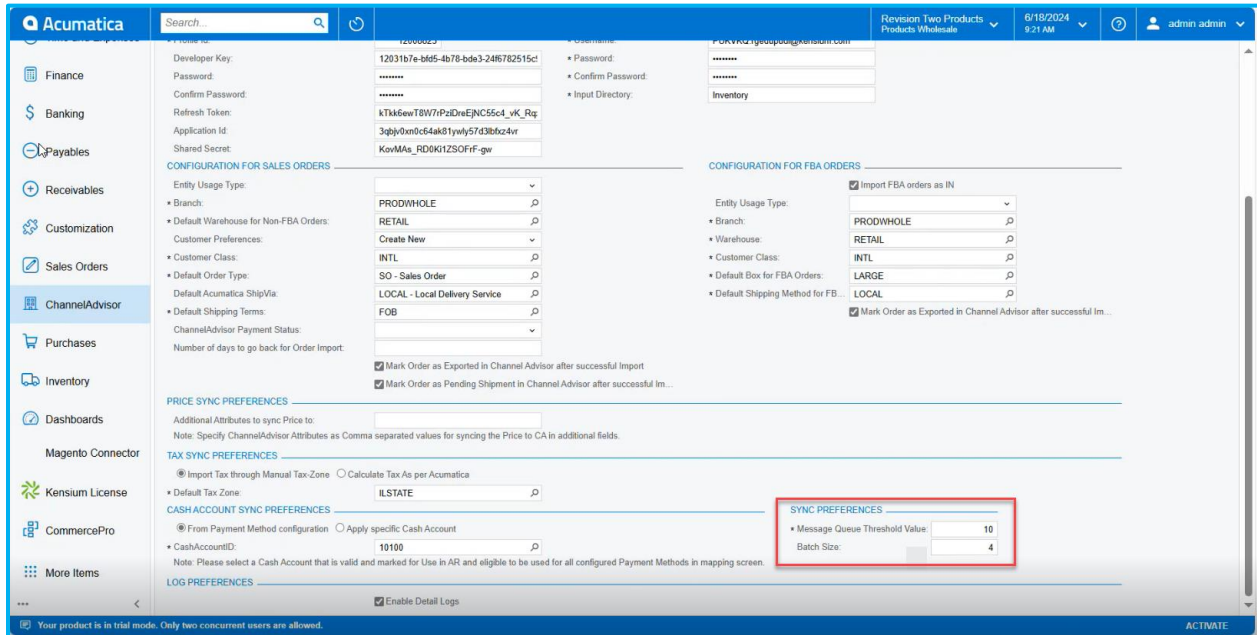

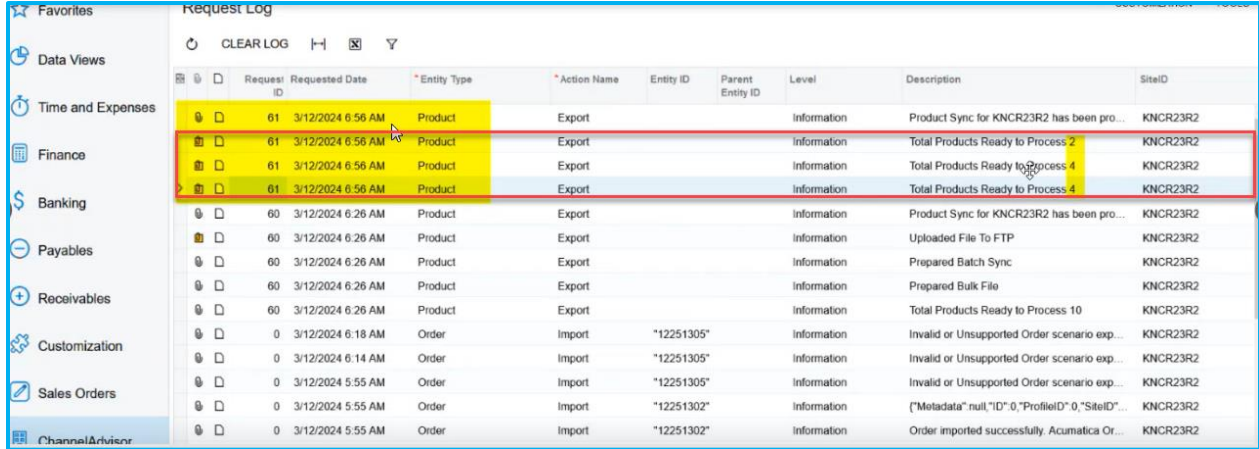

Figure: Sync Preferences details fields

Illustration:

Message Queue Threshold Value is set to 10 and the Batch Size is set to 4. So, when we are syncing 10 products from Acumatica to Rithum Connector the Batch Size is 4. So, the breakdown of sending the product will be as follows:

- 1st Batch → 4 Products
- 2nd Batch → 4 Products
- 3rd Batch → 2 Products

Introduction of Customer Preferences

We have introduced a new field [Customer Preferences] in the Site Configuration Screen under Configuration for Sales Orders as shown below.

The screenshot shows the 'Configuration for Sales Orders' section in Acumatica. The 'Customer Preferences' field is highlighted with a red box and is currently set to 'Create New'. Other visible fields include 'Entity Usage Type', 'Branch', 'Default Warehouse for Non-FBA Orders', 'Default Order Type', 'Default Acumatica ShipVia', and 'Default Shipping Terms'. The 'ChannelAdvisor Payment Status' is also visible.

Figure: Customer Preferences Field

This new drop-down field will have the following options:

- Create New

- Use Existing

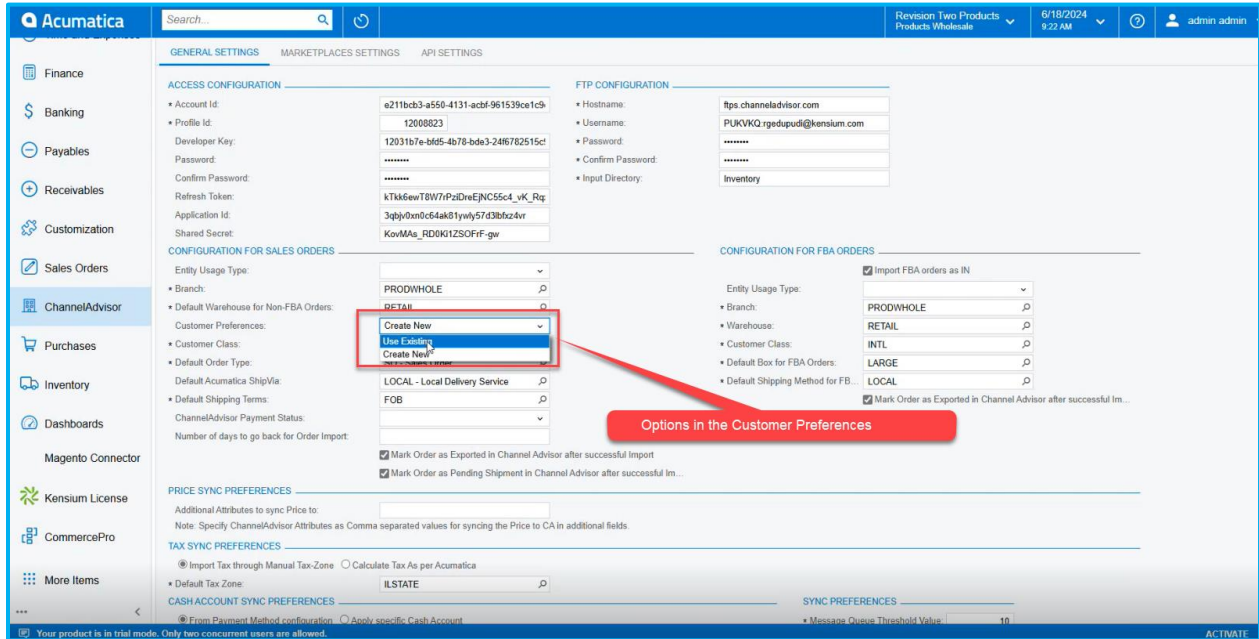

Figure: Options in Customer Preferences

- Use Existing: Upon selecting the option [Use Existing] you will be able to view the Customer ID.

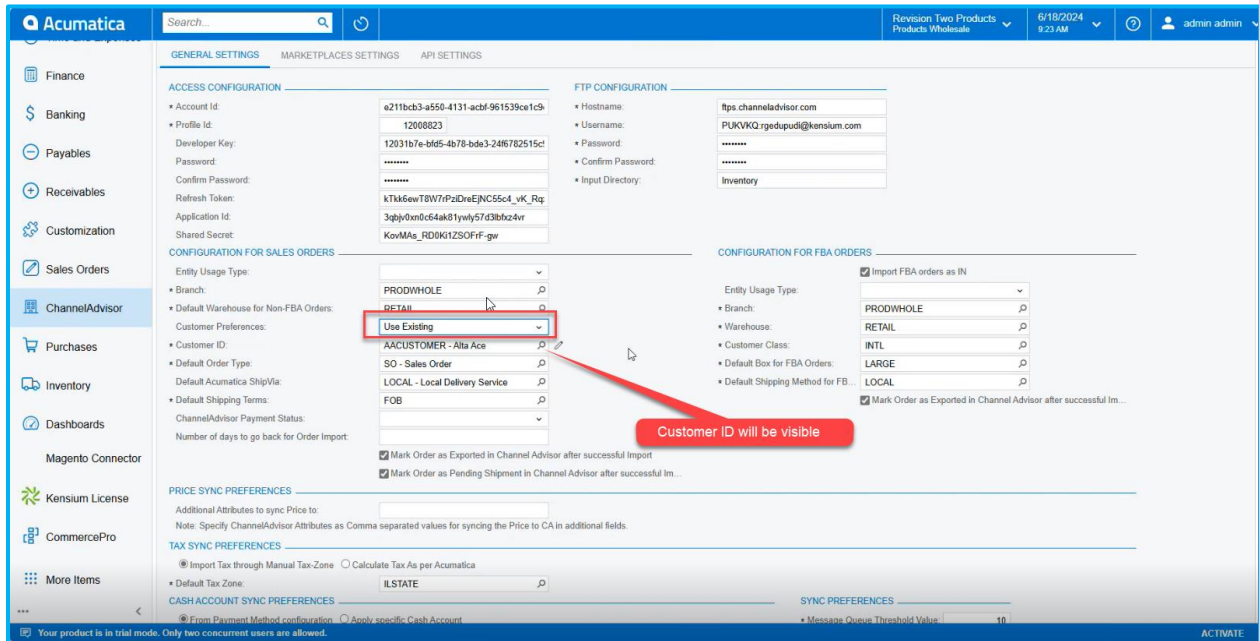

Figure: Upon selecting the option [Use Existing] the Customer ID will auto-populated

The mapped customer will be automatically populated and if you place any non-FBA order from Rithum Connector to Acumatica you can view the mapped customer on the Sales Order screen.

- **Create New:** When you select the **[Create New]** option, any order placed from Rithum Connector to Acumatica will display the assigned customer on the Sales Order screen for non-FBA orders.

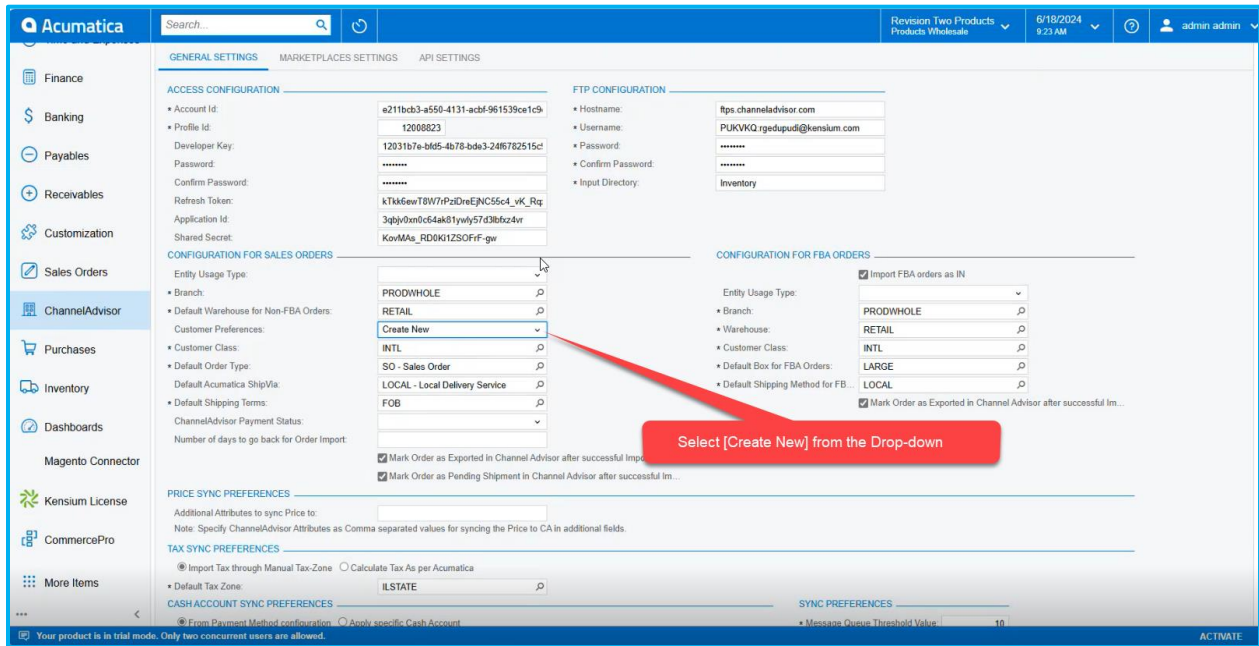

Figure: Select the Option [Create New]

The same will be reflected under the Marketplace Settings with [Customer Preferences]. A new column [Customer Preferences] has been introduced with the drop-down menu to select User Existing / Create New as shown below.

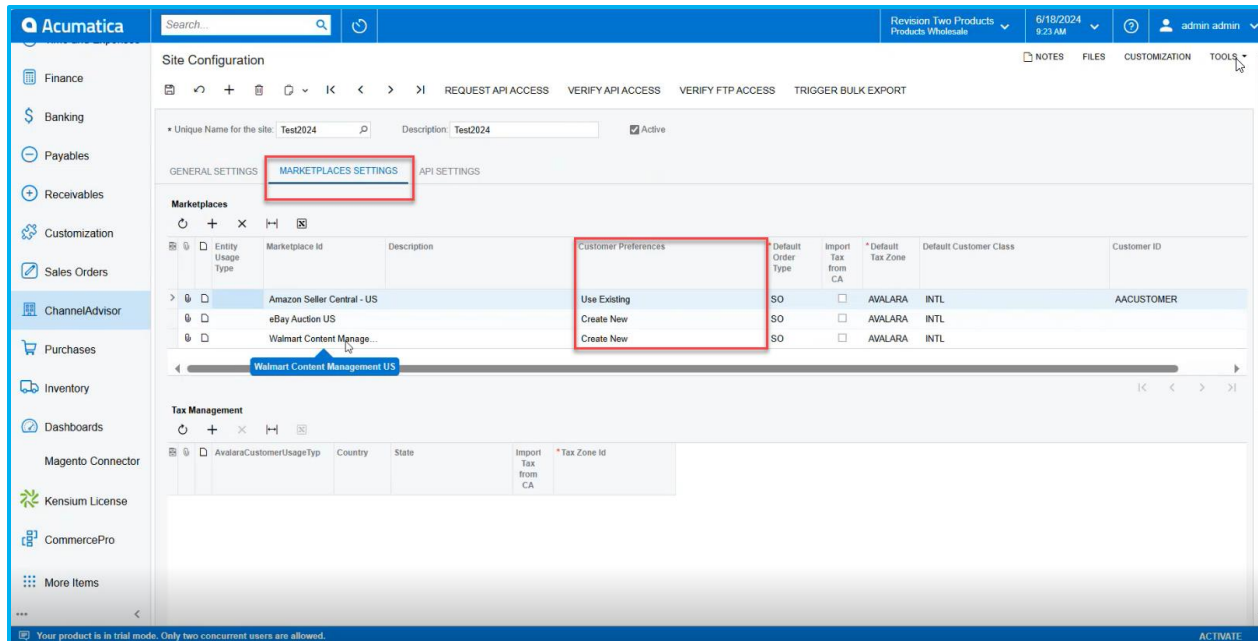

Figure: New column Customer Preferences in Marketplace Settings

If you select Use Existing, the mapped customer will be displayed on the Sales Order screen. However, if you select Create New the the Customer ID field will be non-editable.

Illustration:

Navigate to Rithum Connector to place an order.

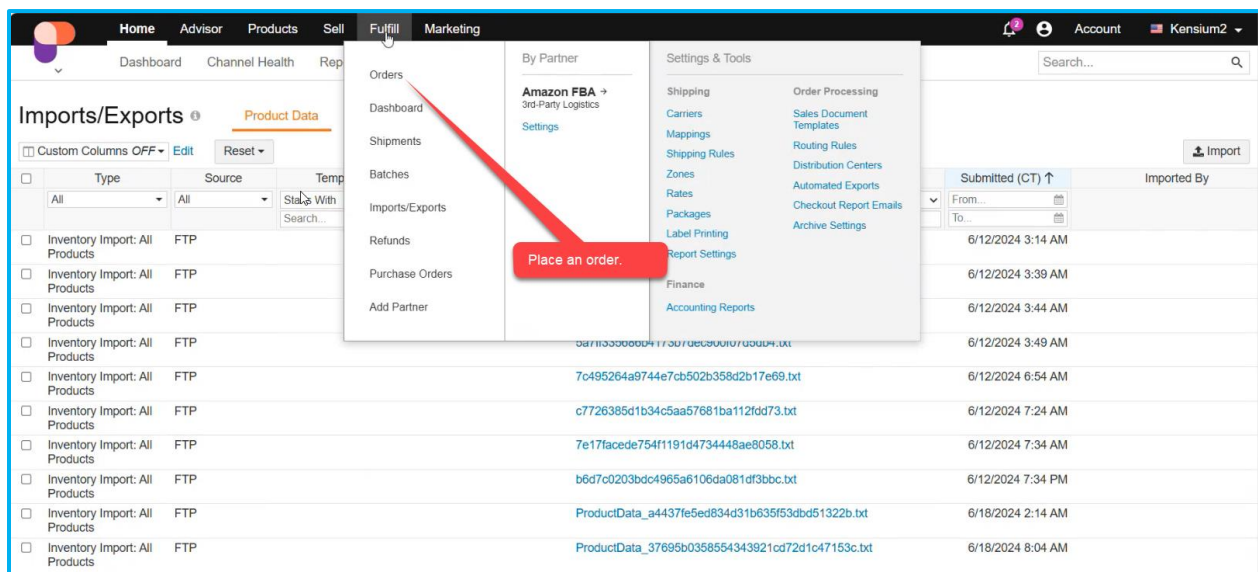

Figure: Place an Order – Step 1

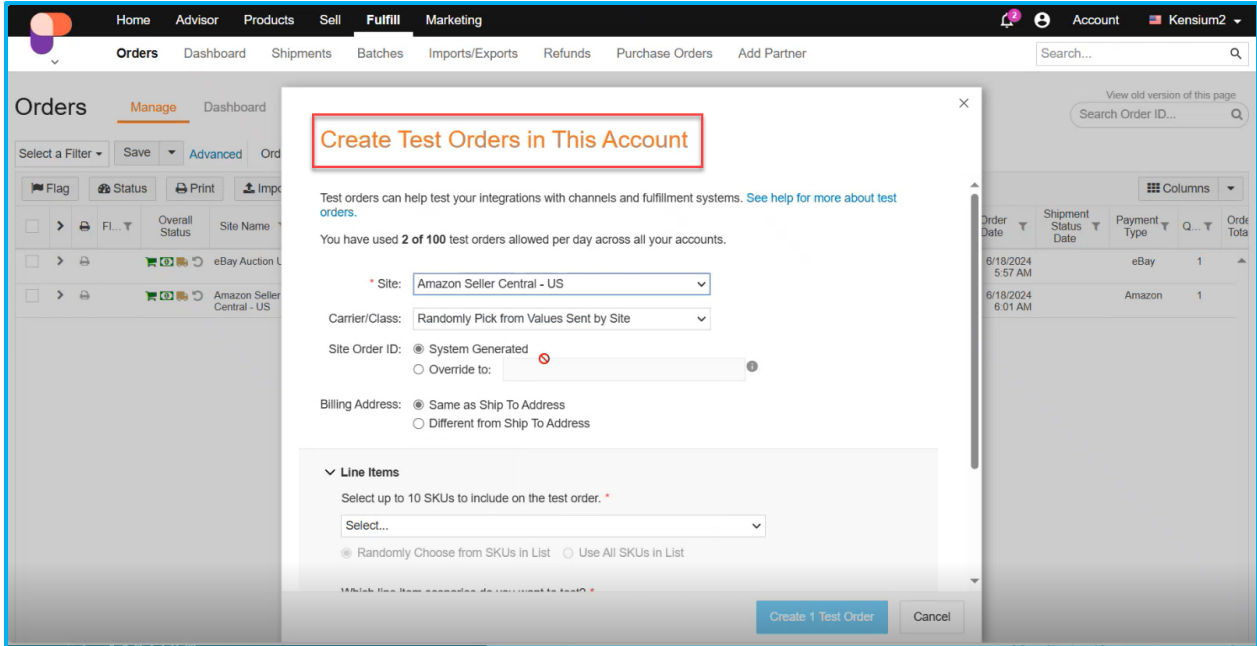

Figure: Place an Order – Step 2

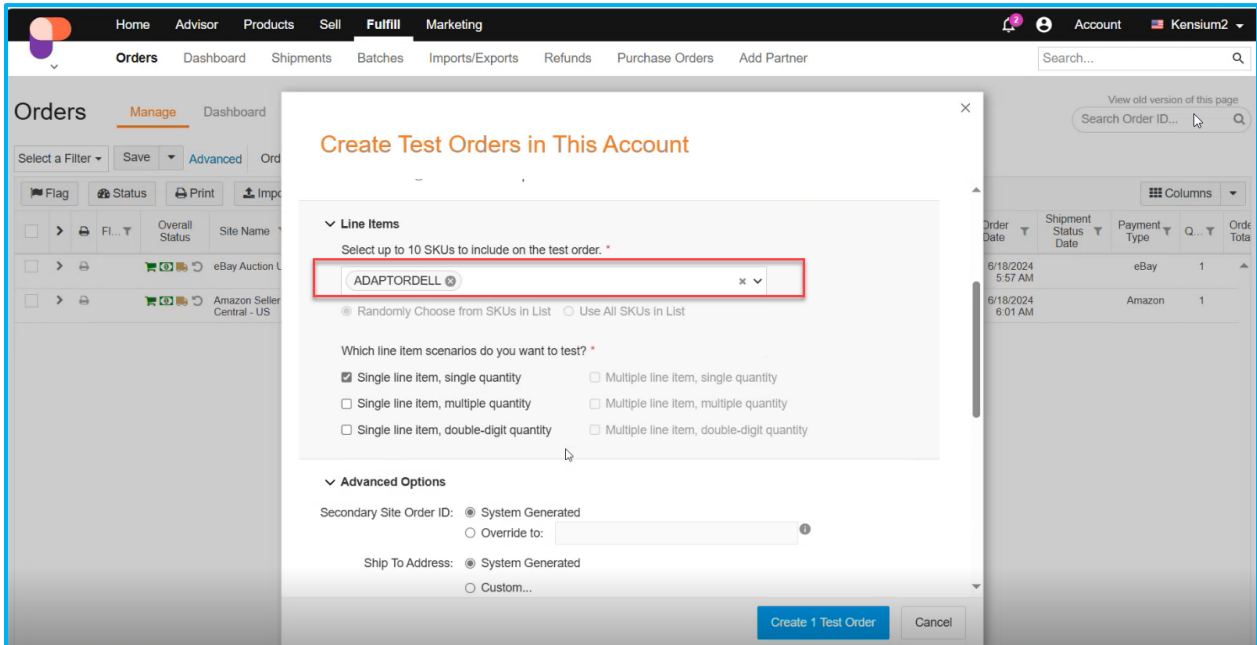

Figure: Place an Order – Step 3

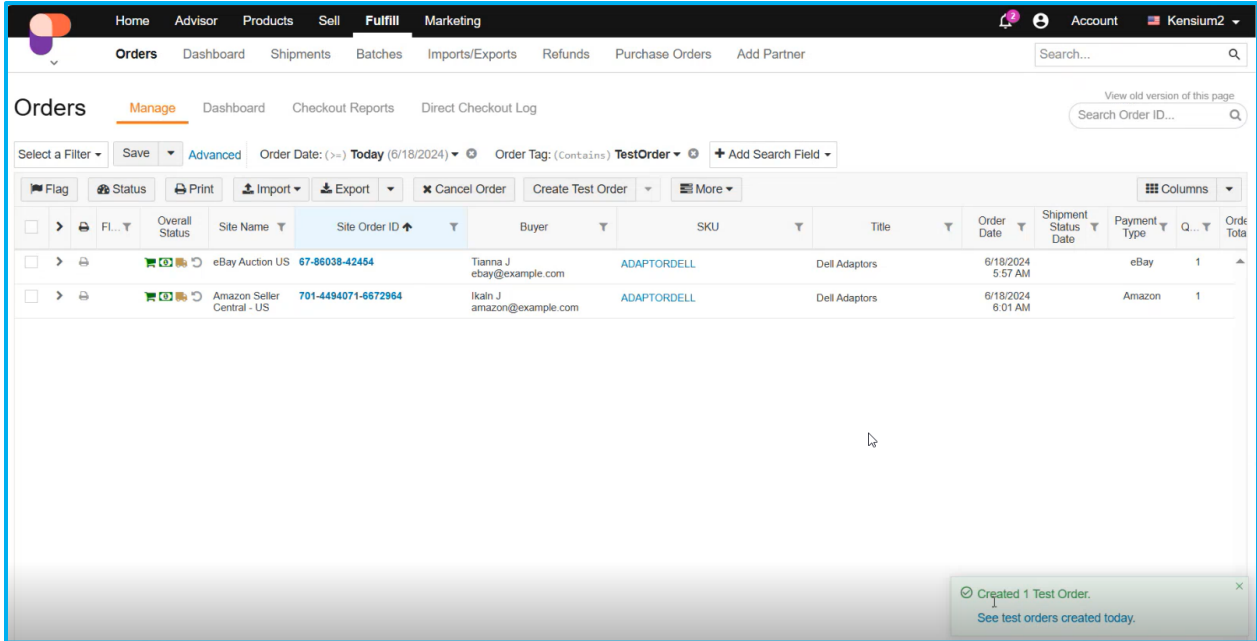

Figure: Place an Order – Step 4

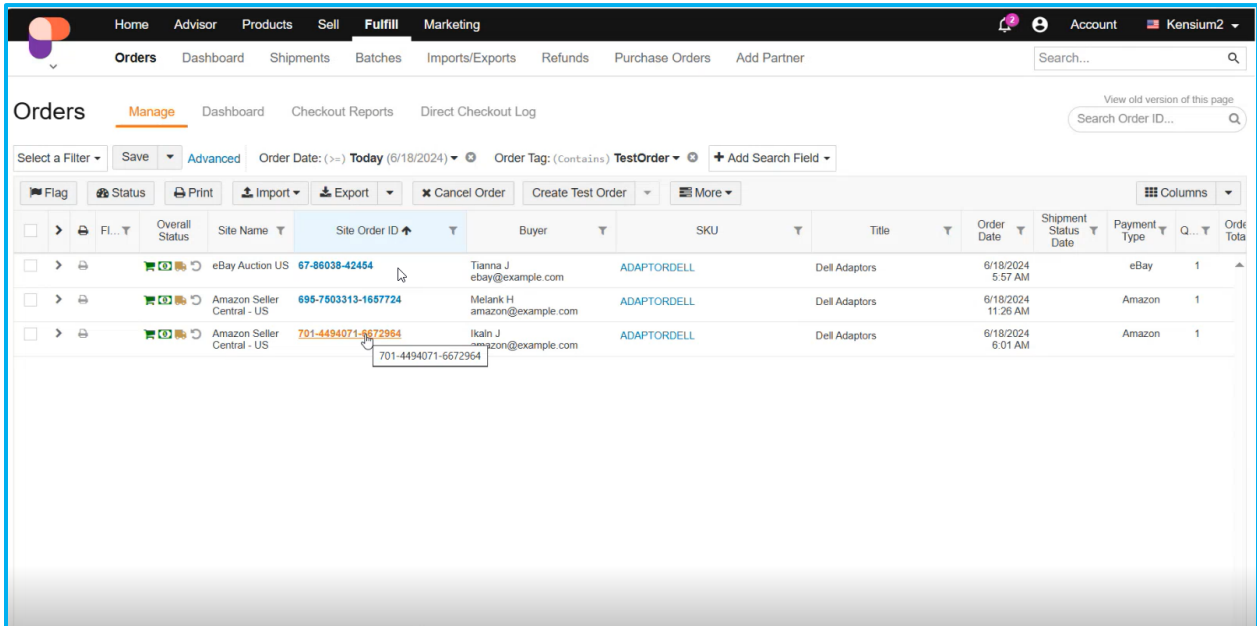

Figure: Place an Order -Step 5

Now navigate to Acumatica to [Import] the Order. Upon clicking the Import option you need to click on the [Prepare] the order.

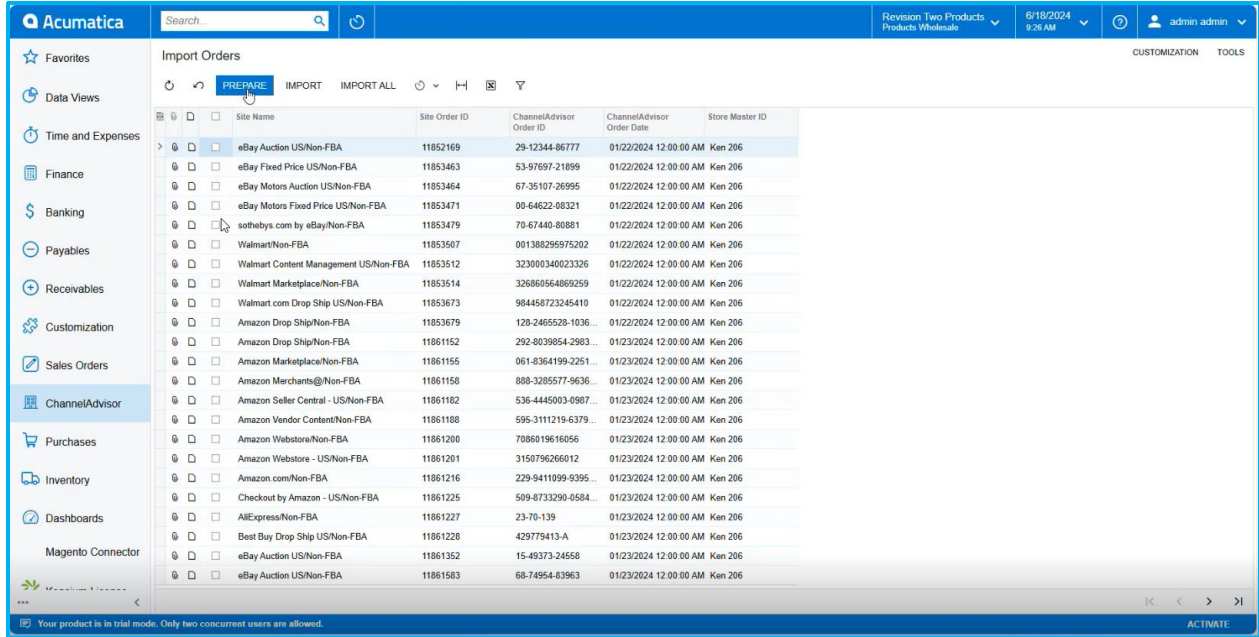

Figure: Prepare the Order in Acumatica

To import the Order click on the [Import] button, the progress bar will appear on the screen.

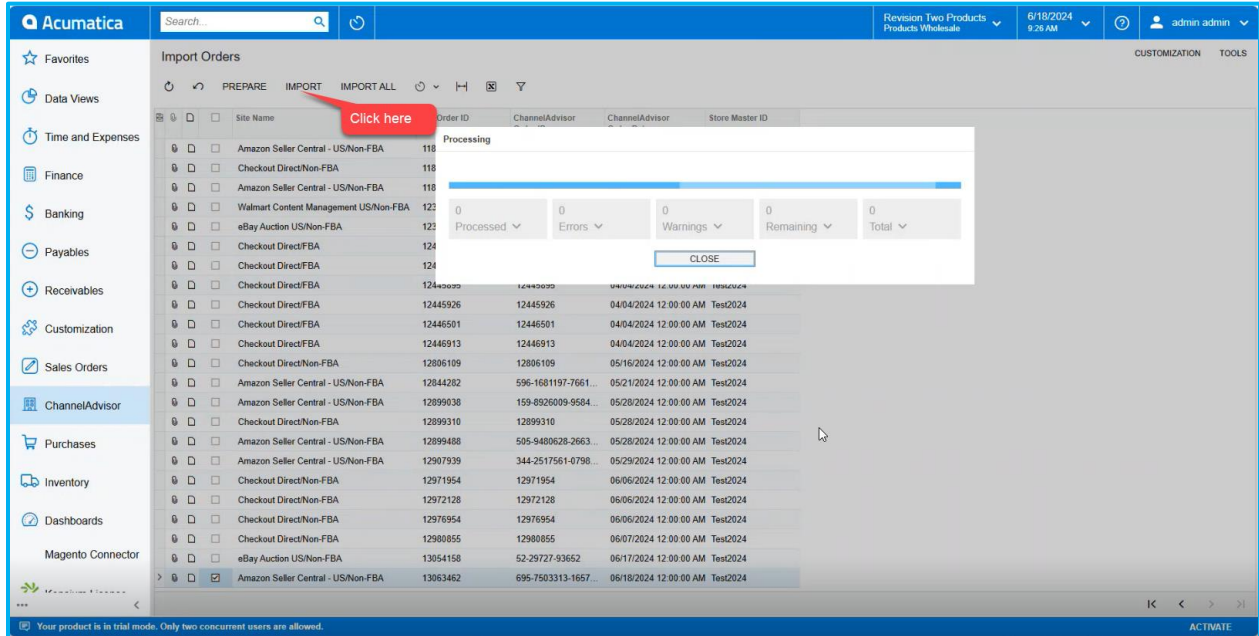

Figure: Import routine is processing

Navigate to Request Log to see whether the order has been successfully imported.

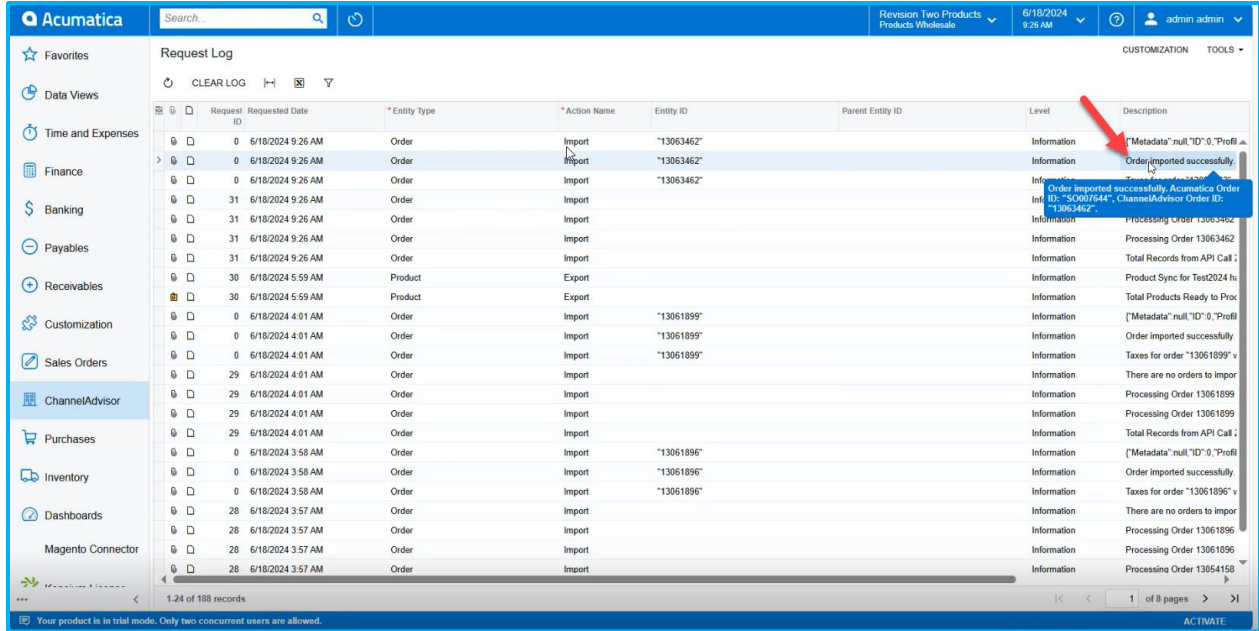

Figure: Confirmation message for successful Order Import

Navigate to the Sales Order section and open the sales order screen.

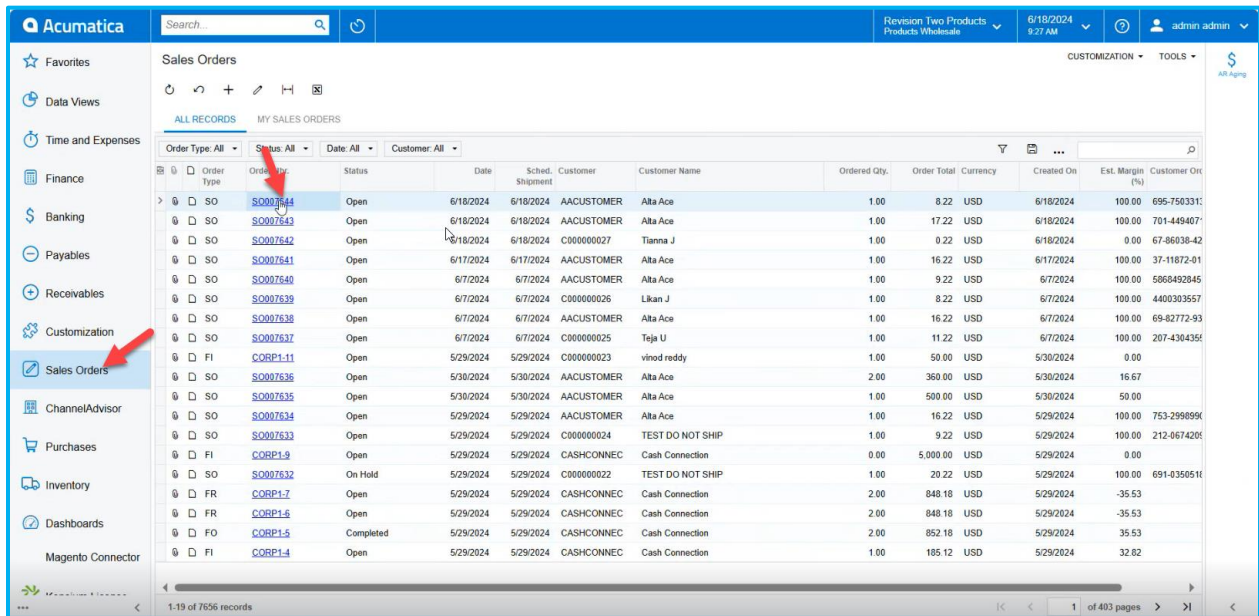

Figure: Select the Order to open.

Open the order by clicking the Order ID and you can view the order has been imported from Rithum Connector.

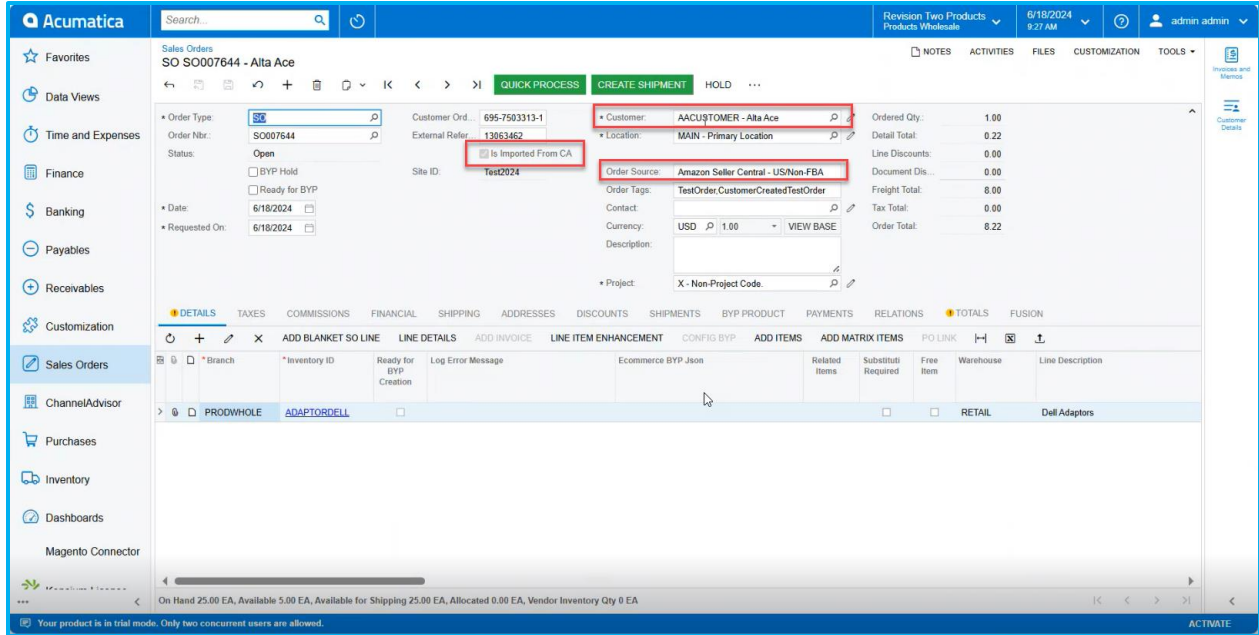

Figure: Sales Order Details

Installation Changes

There are no installation changes included in this release.

UI Changes

There are no UI changes included in this release.
