New Features and Enhancements

Location and Container ID introduced in Print Pick List

Navigate to the Fusion Sales Order Preferences and enable the [Advance Allocations – Pallets from Pallet Stock] under the Pick Optimization Settings.

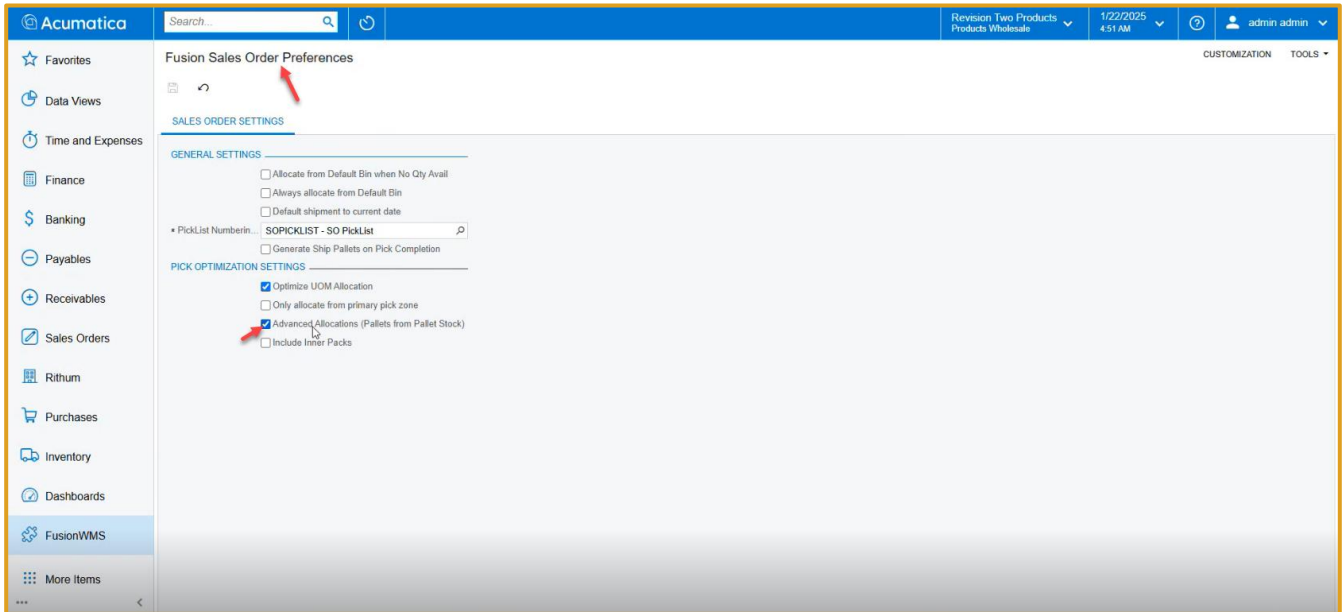

Figure: Advance Allocation (Pallets from Pallet Stock) enabled.

Now navigate to the Sales Order and create a Sales Order.

Figure: Create a Sales Order and Save it.

Now navigate to the Container Screen from Transaction under Fusion WMS. Create a new record in the container screen and the warehouse should be the same as in the Sales Order. Give the same details [Inventory ID and Quantity] that you have given in the Sales Order and save the record.

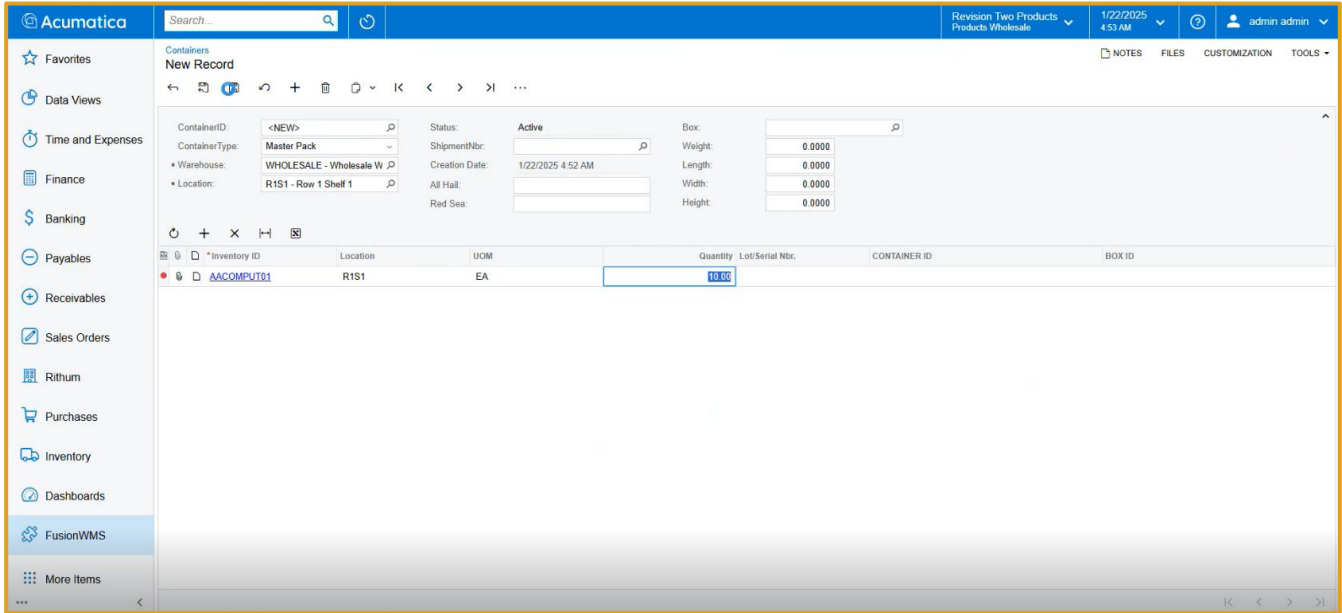

Figure: Create a record in the Container Screen

Note that, the Box ID is a mandatory field in the Container Screen.

Now create the shipment from the Sales Order Screen.

Figure: Create the Shipment in the Sales Order Screen.

From the Shipment check the Container Details and the Alternate ID will show you the Container Details. Click on […] beside the Print Container Labels to open the Print Pick List.

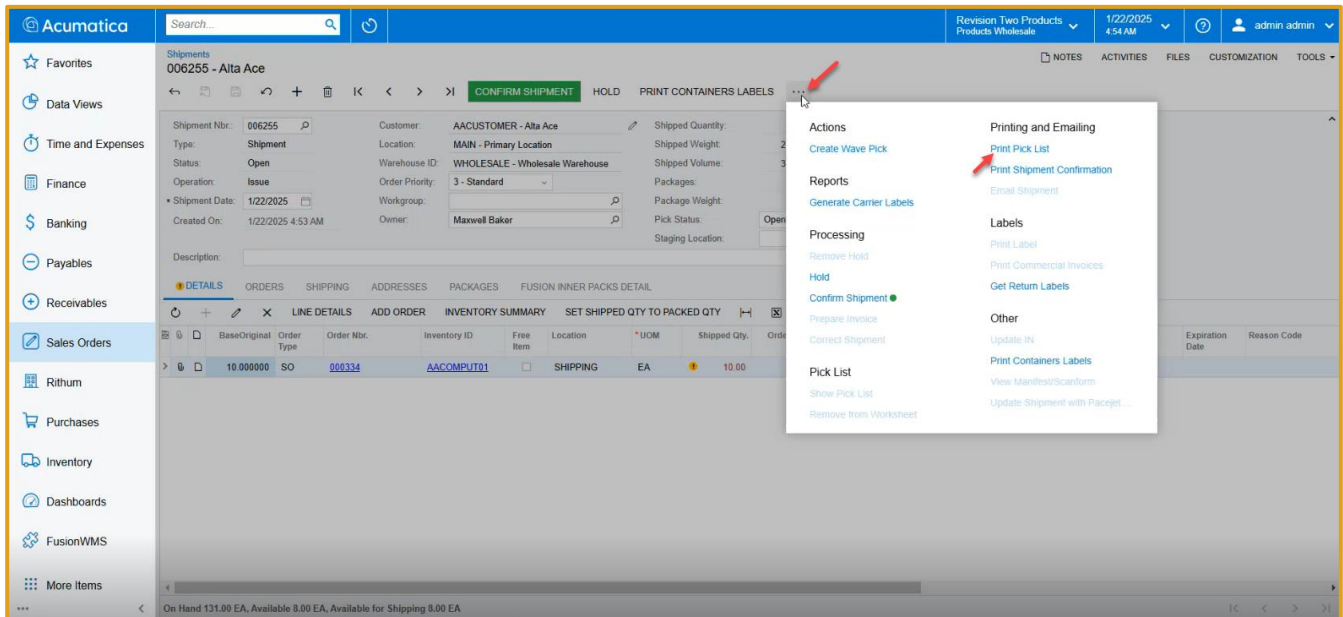

Figure: Click on Print Pick List.

Upon clicking on the Print Pick List, you will be redirected to the Pick List screen and the newly added columns [Container ID] and [Location] will be displayed.

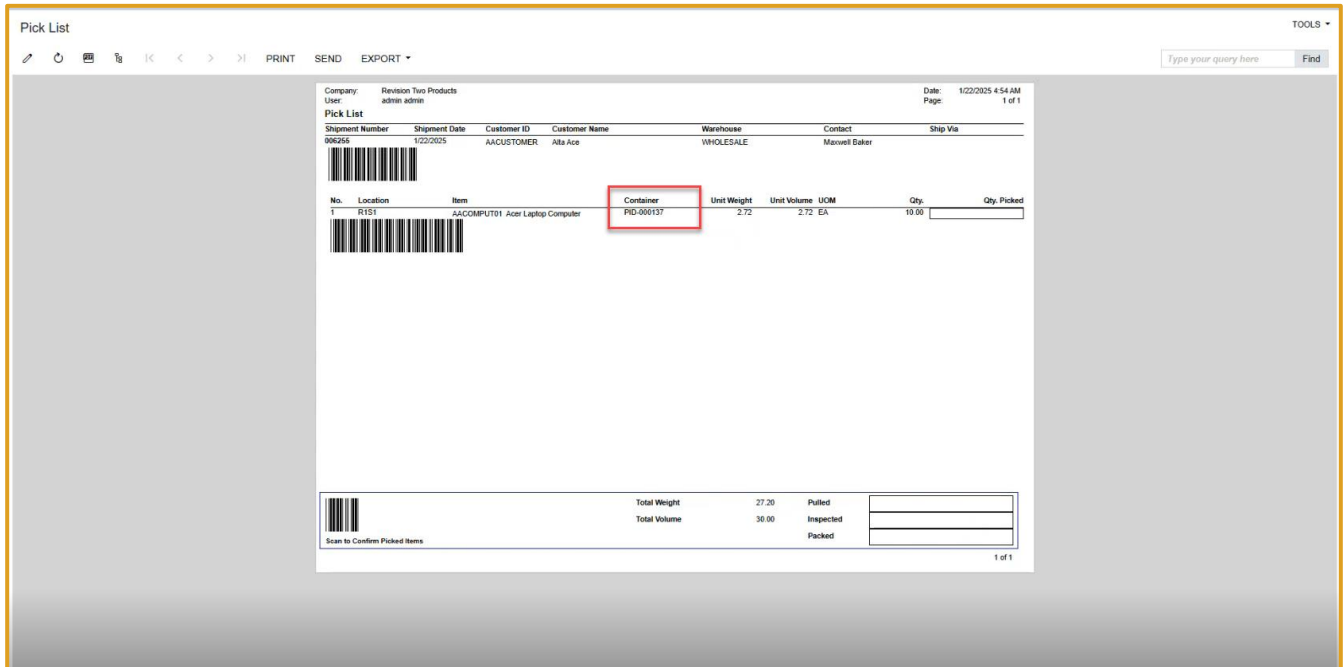

Figure: Location and Container ID introduced in Print Pick List

Container Header's Physical Location on the HandHeld

On the Handheld the Location will be displayed after entering the Container ID.

Figure: Location column will be displayed on the HandHeld.

Installation Changes

There is no installation changes included in this release.

UI Changes

There are no UI changes included in this release.

Known Bugs and Issues

- Publishing the VTechEndPointV6[24.103.0036] [0001.0004] package created an issue with the Access Right with Roles in Fusion WMS. This version resolves the issue. (WMS- 780)

- The Alternate IDs were not correctly configured according to the settings from the Fusion Inventory Preferences (FR-Scan Item screen). (WMS- 803)
- On the PackStation the View Log hyperlink was not showing the Log Details. (WMS-840)
- Review Packs on the Handheld did not show the correct details. The shipping quantity appeared as 0. (WMS-832)
- The issue in the PickPack module with the quantity has been resolved after publishing the latest 24R2 WMS packages and APK file on Handheld. (WMS- 874)
- An error message was displayed after entering the Shipment Number in the Container Screen even though there are no line details. (WMS-875)
- Even after publishing the latest packages i.e. WMS 9.1.0 (Basic and Advanced) and the latest APK, the HandHeld were showing an error in the Optimization Package under the [About]. (WMS-884)
