No Features or Enhancements are implemented in this release.

Installation Changes

No installation changes are implemented in this release.

UI Changes

No UI changes are implemented in this release.

Known Bugs and Issues

- ✓ On the Accounts Receivable Preferences page, when Branch Base is selected for Customer Email Uniqueness, the system is not displaying a validation message, even if multiple branches share the same email ID. (CPC-77)
- ✓ On the Account Receivable Preferences page, when Customer Email Uniqueness is selected as Customer Class Base, the system does not enable the Validate Contacts and Active checkboxes, even after selecting Type and Customer Class. (CPC-78)
- ✓ The system displays an error when the user clicks GI Name on the Account Receivable Preferences page when Customer Email Uniqueness is set to Customer Class Base or Branch Base and Type is not entered. (CPC-79)
- ✓ The Account Receivable Preferences page is taking extended time to save the selection after the Active checkbox is selected. (CPC-80)
- ✓ On the Accounts Receivable Preferences page, when Customer Email Uniqueness is selected as Customer Class Base, the system is not displaying a validation message for when a customer is created with a duplicate email ID, even after the Ignore Email option is unchecked. (CPC-81)
- ✓ On the Account Receivable Preferences page, after Customer Email Uniqueness is selected as Customer Class Base and entering the GI Name, the Generic Inquiry is not being created. (CPC-84)
- ✓ Unique Customer Order Number checkbox in the Sales Order Preferences screen is enabled, but the application is not showing a validation message when two different orders are created with the same Customer Order Number. (CPC-94)
- ✓ In the Sales Order screen, when a new Inventory ID is entered under customer, the user is facing an object reference error. (CPC-296)

All identified bugs and issues have been analyzed and rectified.
