New Features and Enhancements

No features or enhancements are implemented in this release.

Installation Changes

No installation changes are implemented in this release.

UI Changes

No UI changes are implemented in this release.

Known Bugs and Issues

- ✓ The Website(s) field under Customer info is not being synced between Acumatica and Adobe. (CPC-277)
- ✓ Acumatica is not displaying the Column Section name in the Merchandising section for Stock and Non-Stock items. (CPC-305)
- ✓ The Merchandise section remains visible on the Stock Items page even after the Dynamic Merchandising checkbox is unselected and saved on the CommercePro Features Management page. (CPC-306)
- ✓ The user is not able to delete S3 Images for Stock, Non-Stock, and Template Items that were added manually. (CPC-309)
- ✓ When Create Kit On Fly is disabled, the Quick Kits Assembly Management grid is not disabled on the Sales Order Preferences page. (CPC-312)
- ✓ Duplicate customers are not synced from Adobe to Acumatica even after the Ignore email checkbox is selected. (CPC-323)
- ✓ Template items are shown under Free Items in the Related Items tab of the Stock Items page in Acumatica. (CPC-331)
- ✓ When Validate Contacts and Active check boxes are enabled and saved, Ignore Email is also enabled. (CPC-349)
- ✓ When the Kit Qty is updated for Matrix items and processed, the Kit Qty is not being updated for Stock/Non-Stock items at the item level. (CPC-357)
- ✓ Duplicate customers are not synced from Adobe to Acumatica even when Tentant Base is selected for Customer Email Uniqueness on the Accounts Receivable Preferences page and the Ignore Email checkbox is enabled. (CPC-371)
- ✓ Duplicate records are not synced from Adobe to Acumatica even when the Ignore Email and Ignore Email and Ignore Duplicates checkboxes are enabled on the Accounts Receivable Preferences page. (CPC-372)
- ✓ Acumatica is displaying Refresh Kit Price Process, Process Quick Kits, and Clear Log, which are Commerce pro-related options, without a license being applied. (CPC-329)
- ✓ The user is facing an error when a vendor is selected in the Vendor Inventory screen after the Vendor ID is added in the Vendors tab on the item level page of Stock Items. (CPC-334)
- ✓ When an order is processed with Stock Items, the vendor quantity is not being updated as per ACM Vendor Inventory Details By Date. (CPC-336)
- ✓ The User is facing an error when trying to save the preferences after selecting Order Types under Order Uniqueness in the Sales Order Preferences screen. (CPC-338)

- ✓ After Numbering Settings and Target Items are updated on the Inventory Preferences page and a new rule is created on the Category Rules page, when a new Stock Item is created that satisfies the created rule, the Category ID under Sales Categories is not being updated. (CPC-342)
- ✓ On the order level page of a Sales Order, when Line Item Enhancement is clicked and the Inventory ID search icon is selected in the Add Enhancement pop-up, the application shows all stock items instead of only the associated items. (CPC-346)
- ✓ The User is facing an error when they are trying to save the preferences after selecting Create Kit Assembly on Sales Order Save or Create Kit Assembly on Shipment Creation under Quick Kits Assembly Management in the Sales Order Preferences screen. (CPC-347)
- ✓ The User is facing an error when adding new Applicable Item Classes and Applicable Inventory Items. (CPC-348)
- ✓ The Create Kit Assembly option is still visible on the order level page of Sales Orders after the Create Kit on Fly is unselected on the CommercePro Features Management page. (CPC-361)
- ✓ On the Calculate Kit Qty Process screen in Acumatica, after clicking Process, the Processing window is showing Errors, and the user is unable to complete the Process action. (CPC-344)
- ✓ The Kit Qty Last Calculated details are not being updated in real time on the Inventory Preferences page of Acumatica. (CPC-358)
- ✓ Once the Inventory Updated Date is passed, the Days to Keep Inventory, Quantity At the Vendor, and Available For Sale (%) are still reflected with pre-set values without becoming 0. (CPC-335)
- ✓ After the Sales Unit and Conversion Factor are updated in the General tab of a Template item page, the UOM Price in the Price/Cost tab is not being updated based on the Default Price. (CPC-341)
- ✓ Users are unable to view the Merchandising Section on the Item Classes page even after the feature is enabled on the CommercePro Features Management page. (CPC-343)
- ✓ A shipping restriction validation message is not displayed on the Sales Order page when the address selected is in the state that is added to Shipping Restriction Zones. (CPC-356)
- ✓ When the Create Kit Assembly on Sales Order Save checkbox under Quick Kits Assembly Management in the Order Types page is selected, the Allocated checkbox is not selected in the Line Details page at the order level of a Sales Order. (CPC-359)
- ✓ When the Create Kit Assembly on Shipment Creation option is selected at the Order Type level, the corresponding sales order record is visible on the Process Quick Kits screen. (CPC-360)
- ✓ When the Customer Order Summary feature is enabled on the CommercePro Features Management page, Acumatica is taking a long time when a Sales Order is being saved. (CPC-318)
- ✓ The Possible Kit Qty Calculation on the Stock Items page is not being calculated based on the UOM selected in the Kit Specifications. (CPC-398)

All identified bugs and issues have been analyzed and rectified.
