No features or enhancements are implemented in this release.

Installation Changes

No installation changes are implemented in this release.

UI Changes

No UI changes are implemented in this release.

Known Bugs and Issues

- ✓ After selecting the Enable for Magento Sync checkbox on the Item Classes page, the application displays an error when the user clicks Save without applying the Commerce Pro license. (CPC-83)
- ✓ Clicking the Refresh S3 Images option in the S3 Images tab of a Stock/Non-Stock Item is causing the S3 Images tab to disappear. (CPC-220)
- ✓ When images are uploaded for a child item from the S3 images portal, the uploaded images are also reflected under the parent item. (CPC-225)
- ✓ Processed S3 images are not appearing under the S3 Images tab on the Stock Items page for matrix items. (CPC-239)
- ✓ The user is facing a failure error when performing the Create Shipment action from the Process Orders screen. (CPC-87)
- ✓ When navigating to the Customer Classes page under Preferences from the Receivables menu and selecting the Class ID as INTERCO, if the customer classes are updated with Website(s) under Commerce Pro Multi-Branch Support set to blank, the previously entered websites still appear. (CPC-213)
- ✓ The user is able to see the Commerce Pro Multi-Branch Support option even after unselecting the Multi-Website Support for Customers and Products checkbox on the CommercePro Features Management page. (CPC-214)
- ✓ The application is not showing a validation message on the Sales Orders screen when different website(s) are selected on the Customers and Stock Items pages. (CPC-215)
- ✓ After the Vendor Inventory Management checkbox is unselected in the CommercePro Features Management page, when user navigates to the Update Vendor Inventory, ACM Vendor Inventory Details By Date, or Vendor Inventory pages, a message to redirect to the CommercePro Features Management screen and Hyperlink are not displayed and the Vendor Inventory Management checkbox is enable automatically. (CPC-216)

- ✓ After publishing the latest package in Acumatica, the user is not able to view the Sales Price and Vendor Price grids in the Price/Cost tab of the Stock Items page. (CPC-219)
- ✓ The application is not showing a shipping restriction alert when a shipment is created if multiple locations are added under Shipping Restriction Zones. (CPC-223)
- ✓ On the Item Classes page, the user is facing an error when the Row Position value and Column Position value are set to the same, even if the Section Sort Order is different. (CPC-247)
- ✓ The Merchandise section remains visible on the Non-Stock Items page even after the Dynamic Merchandising checkbox is unselected and saved on the CommercePro Features Management page. (CPC-248)
- ✓ The stock items with an unassigned location are not being included during the Inventory Sync between Adobe and Acumatica. (CPC-92)
- ✓ The user is able to view the Vendor Qty of the Stock Items on the ACM Vendor Inventory Details By Date page even if a warehouse is not mapped in the Brach Wise Inventory Association. (CPC-217)
- ✓ The application is showing an error message on the Processing pop-up screen on the Process Quick Kits page. (CPC-222)

All identified bugs and issues have been analyzed and rectified.
