New Features and Enhancements

No features or enhancements are implemented in this release.

Installation Changes

No installation changes are implemented in this release.

UI Changes

No UI changes are implemented in this release.

Known Bugs and Issues

- ✓ When a user syncs the order from Adobe to Acumatica, the Ready for BYP Creation checkbox is not being enabled automatically on the Sales Orders page in Acumatica. (MAC-301)
- ✓ The user is not able to see a warning message on the Config BYP pop-up when an order is synced from Adobe to Acumatica before processing the order. (MAC-307)
- ✓ When an incorrect Access Token is entered in the Setup Parameters in Acumatica, the application does not display a validation message as expected. (MAC-378)
- ✓ When the Active checkbox for Credit Limit is disabled on the Customer screen under Schema Management, the user is still able to see the View Inquiry on the Generic Inquiry page in Acumatica. (MAC-383)
- ✓ The user is unable to save the Item class even after selecting the Enable for Magento Sync checkbox on the Item classes page in Acumatica. (MAC-392)
- ✓ The user is able to view the C-KIT Configurations grid on the Setup Parameters page in Acumatica without the Ckits package being published. (MAC-400)
- ✓ The Qty Avl, Qty Avl on Shipping, and Qty On Hand fields in Adobe are not updated when the Inventory Sync and Product Sync are triggered at the same time in Acumatica. (MAC-404)
- ✓ When the Order Sync is Disabled in Adobe, then on performing individual sync, an incorrect validation message is displayed on the order level page. (MAC-406)
- ✓ When the CP Add On package is published, the connector schedulers are not created based on the Scheduler Frequency set in the Setup Parameters page in Acumatica.(MAC-144)
- ✓ The Acumatica Customer Attribute values are not displayed in the Customer Attribute Mapping in Adobe after the Update Schema action is completed. (MAC-395)

Appendix

| ID | Description |
