UI Changes

Validation Message on Sales Order Screen

The validation message shown when the Customer selects a date range exceeding 15 days for Filter By Dates in the Product, Customer, Sales Order, or Shipment pages under Batch Processes is modified to **Please select a date range of 15 days or less to avoid potential timeout errors** for clear communication and to improve user understanding of the functionality. (MAC-372)

Workspace	Screen	Entity
Acumatica	Batch Processes	Filter By Dates Validation Message

Order Sync Failure Message in Adobe

For a customer record manually added to Acumatica, when an order is placed in Acumatica and fails to sync to Adobe, the Summary of the failure log is corrected to display **Unable to create customer in Magento. Either Customer Sync is disabled, or the direction is only from Magento to Acumatica. Order: order number** for clear communication and to improve user understanding. (MAC-115)

Known Bugs and Issues

✓ Customers with a Customer class that is not selected on the Setup parameters page under A To M Customer Sync Preferences are still displayed in the Batch process screen. (MAC-306)

✓ An Incorrect Price Type is shown on the Connector Logs page of Acumatica and the Sales Price JSON of Adobe when the Sales Price is synced from Acumatica to Adobe. (MAC-317)

✓ The user is unable to filter records for Product Data, Status Data, Pricing Data, Inventory Data, or Kit Qty Data by selecting Filter By Item Classes on the Products page under Batch Processes. (MAC-320)

✓ The Process action in the Shipment and Sales Order under the batch processes is successful in Acumatica even when the Order Look Up Sync and Shipment Sync features are disabled in Adobe. (MAC-324)

✓ Users are not able to view the Sync Dashboard Bar charts on the Sync Status Dashboard screen in Acumatica. (MAC-325)

✓ Section headings are not being displayed in the Kensium A-M Connector tab of Adobe. (MAC-340)

✓ The user is unable to retrieve the records by applying filters in the Price Type, Price Code, InventoryID, Expiration Date, or Last Modified On column on the Sales Prices page under batch processes in Acumatica. (MAC-342)

✓ Inventory Sync logs are displayed twice, one with success and the other with an Error in the Connector Logs page in Acumatica. (MAC-350)

✓ The user is able to retrieve the customer records without entering the required filter parameters in the Customer and Sales Order pages under batch processes. The filters on the Customer page under batch processes are not working as expected. (MAC-352)

- ✓ The user is facing an error when Process is clicked on the Sales Prices page under batch processes in Acumatica even after Sales Price Sync is enabled in both Acumatica and Adobe. (MAC-370)

- ✓ The order type that is not selected in the Order Types to Sync drop-down on the Setup Parameters page is still displayed on the Sales Orders page under batch processes in Acumatica. (MAC-371)

- ✓ The user is not able to load records in the Queue Status page in Magento Admin. (MAC-264)

- ✓ The user is unable to view the Price Code details of sales prices synced from Acumatica to Adobe in the Sales Price JSON for the Sales Prices Sync on the Connector Logs page in Acumatica. (MAC-366)

- ✓ The user is seeing a validation error message on the Inventory page under Batch Processes while performing the inventory data sync for the template item from Acumatica to Adobe. (MAC-26)

- ✓ The user is seeing an error in the Last Execution Result of Scheduler for PRODSTATUS in the Automation Schedule Statuses page in Acumatica. (MAC-32)

- ✓ When a Stock Item is synced from Acumatica to Adobe, the Category ID is not updated under the product in Adobe. (MAC-33)

- ✓ When the Category is synced from Acumatica to Magento, the date and time details for the Last Sync to Magento option are not getting updated under the Kensium E-commerce tab in the Item Sales categories page in Acumatica (MAC-87)

- ✓ The user is seeing a validation message on the Connector Logs screen after completing the Process action on the Product page under the Batch Processes. (MAC-91)

- ✓ When a new address is added on the Customers page in Magento and synced to Acumatica, then an error is displayed, which states that the record already exists. (MAC-96)

- ✓ Order Status Sync status is displaying an error in logs, but order status is updated as expected in Magento. (MAC-131)

- ✓ When a Stock Item is synced from Acumatica to Adobe, the user is not able to view the Vendor Qty details on the Adobe product level page. (MAC-297)

- ✓ The user is facing an error while processing records on the Sales Prices page under Batch Processes in Acumatica. (MAC-389)

- ✓ For an attribute created in Adobe and synced to Acumatica, when the Description in the Attributes page is updated, the Default Label is also being updated in Adobe. (MAC-365)

- ✓ Multiple Order Sync logs are showing as error with the error message "CS Error: Record already exists" on the Connector Logs page in Acumatica. (MAC-94)

- ✓ When a BYP item is created with attributes that are not available in Acumatica and an order is placed using the created BYP from Adobe, the user is not shown a validation message on the Process BYP orders when the BYP order is processed. (MAC-176)

- ✓ When the Decrease Stock When Order is Placed option is selected as Yes in Adobe, the item Quantity is not adjusted after an order is placed with the item. (MAC-336)

- ✓ When a Sales Price is deleted in Acumatica and the Sales Price Sync is completed, the Sales Price is not deleted in Adobe. (MAC-368)

- ✓ When the Tax ID value selected on the Sales Orders screen is not Manual, the IsTaxValid value on the Developer logs JSON is not being shown as False. (MAC-129)

- ✓ The Name entered under Primary Contact is passed with incorrect values from Acumatica to Adobe. (MAC-240)
- ✓ Customer Price Class with Break Qty as 0 is failing to sync from Acumatica to Adobe. (MAC-304)

All identified bugs and issues have been analyzed and rectified.
